

## Attachment 2: Parks by Ward/Area and Classification

Toronto's parks come in all shapes and sizes. They are located throughout communities and neighbourhoods, ravines, and along the waterfront. The City's parkland and ravine system cover 13 per cent of the total land area of the City, which includes over 1,500 parks and encompasses over 8,000 hectares of land.

The Parks Plan 2013-2017 classifies these parks into five types, as described in **Table 1** below. Although the park classification has been provided for our audit results in **Table 2** of this report, it is important to note that the Parks Branch does not have a centralized listing identifying service levels by park. Therefore, we reviewed all parks in our sample against the "generally maintained" service standards. Our audit report included a recommendation to create and maintain a standardized service level for each park classification.

**Table 1: Parks Classification System**

Description
<b>Parkette</b> primarily used by local residents. They are generally less than 0.5 hectares. Primarily used for passive recreation.
<b>Neighbourhood Park</b> primarily used by local residents. They are generally not less than 0.5 hectares. Primarily used for passive recreation.
<b>Community Park</b> primarily used by several neighbourhoods. They are generally not less than 3 hectares. May feature opportunities for both passive and active recreation.
<b>District Park</b> primarily used by several communities. They are generally not less than 5 hectares. They may act as a recreational hub. They typically feature opportunities for both passive and active recreation.
<b>City Park</b> typically attract users from across the City. They are generally not less than 15 hectares, and/or include unique and specialized features, like horticultural gardens.

Our audit covered crews maintaining over 650 parks across 12 local ward/areas and one area of the Waterfront, during a week in June and/or August 2023. The breakdown of the achievement of service level standards (based on information reported in the daily logs) for parks included in Figures 9, 10, and 11, by ward/area and classification is included in **Table 2**.

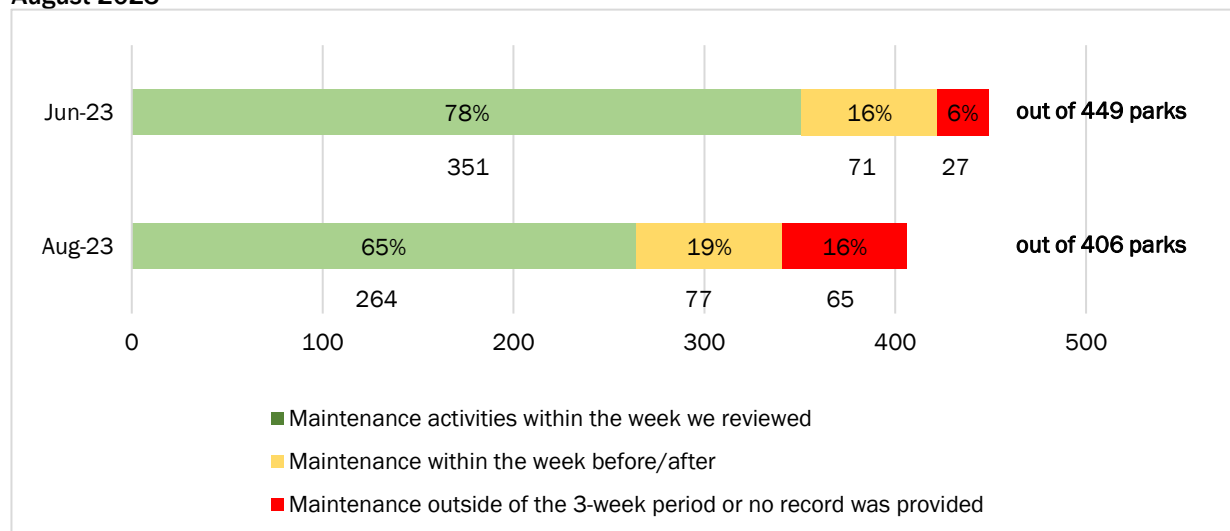

### **Excerpted from the Auditor General's Report, "Audit of Parks Branch Operations - Phase 1: Improving Oversight of Day-to-Day Maintenance Helps to Ensure City Parks are Beautiful, Clean and Safe" (pages 30-31 of Attachment 1)**

The green bars [in **Figures 9, 10 and 11** below] indicate the number of parks in our sample where the service level standards were met, the yellow bars indicate the number of parks where the standards were partially met, and the red bars indicate the number of parks where the standards were not met, based on information reported in the daily logs.<sup>1</sup>

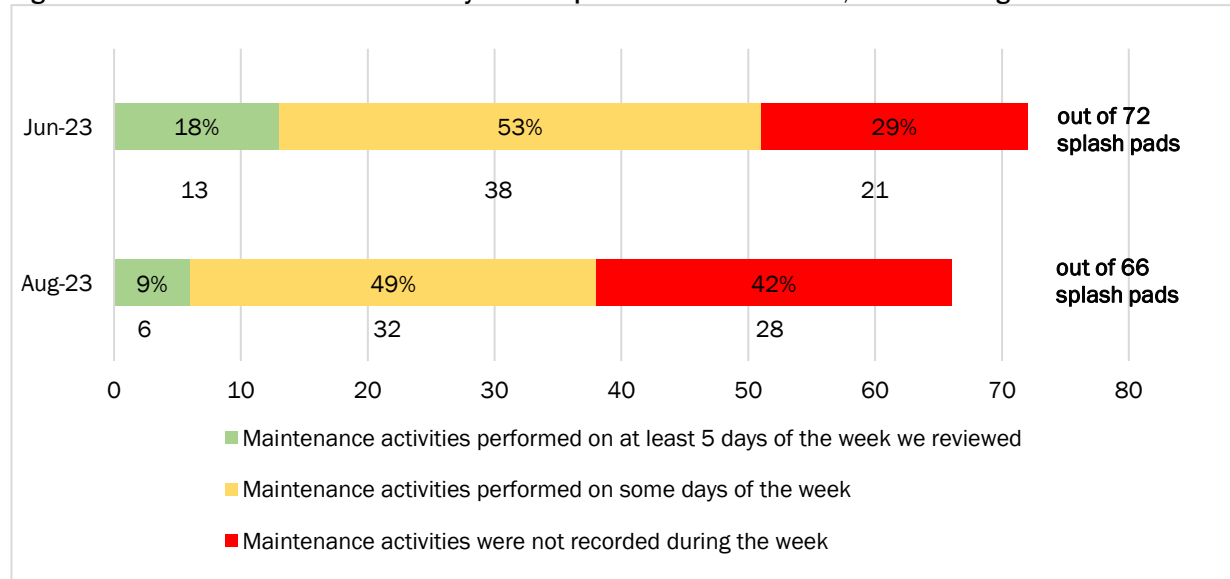

---

<sup>1</sup> Our analyses excludes parks that were under construction / not operational, and parks maintained by a third-party / contractor. This includes 28 of 477 parks (6 per cent) in our sample from June 2023, and 25 of 431 parks (6 per cent) in our sample from August 2023.

**Figure 9: Service Level Standards Analyses for Litter Picking, Grass Mowing/Edging Trimming<sup>2</sup>, June and August 2023**

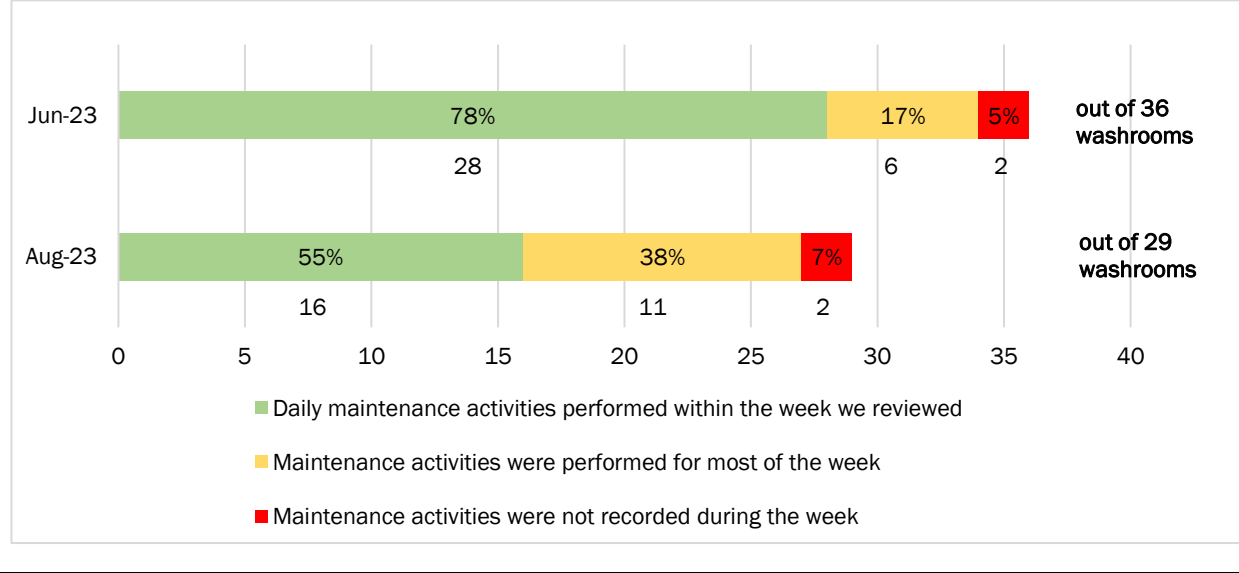

**Figure 10: Service Level Standards Analyses for Splash Pad Maintenance, June and August 2023**

*Note: Management advised that some crews may not be properly identifying in the daily logs that they performed daily maintenance and inspections of splash pads while completing other maintenance activities at the park (e.g., staff may record that they visited the park and completed litter picking activities but did not separately check off that they also maintained/inspected splash pads).*

<sup>2</sup> Parks Branch does not have a centralized listing identifying which parks receive higher levels of service. Therefore, we reviewed all parks in our sample against the “generally maintained” service standards. There is evidence that some parks received a higher level of service. Refer to Exhibit 1, for further details on the service level standards.

**Figure 11: Service Level Standards Analyses for Washroom Maintenance, June and August 2023**

**Table 2: Breakdown of Service Level Standards Analyses June and August 2023 by Park Name**
