Toronto, ON M5H 2N2

Dear Infrastructure and Environment Committee,

The Structural Pest Management Association of Ontario (SPMAO) is the most experienced and largest professional structural pest management association in Ontario. With more than 165 member companies and over 1000 pest management professionals, our association actively protects the health and safety of all Ontarians by ensuring the safety of our province's food chain, health care and educational facilities, residential dwellings, hotels and restaurants.

We previously assisted the City of Toronto with the creation of the RentSafeTO Apartment Building Standards Program and are more than happy and willing to consult with your committee throughout the development of the proposed Rodent Reduction Strategy.

We look forward to the opportunity to work together to develop and implement a strategy that not only addresses the current rodent issues but also sets a benchmark for urban pest management across the region.

Regards,

Mike Dunn

SPMAO
