

Attachment 5 – Identification of Spaces Outside the Downtown Core - TTC Routes

Economic Development and Culture has worked with City Planning to identify the areas suggested by do-it-yourself event organizers in which zoning already permits entertainment uses. These areas of overlap currently include (but may not be limited to) the following list.

Route adjustments proposed within the TTC 2025 Annual Service Plan have also been included to highlight commercial land where zoning may permit entertainment uses as of January 1, 2025. This list will be updated once the 2025 Annual Service Plan is finalized (approved through the TTC Board) and will then be used as a reference document for the Night Economy Internal Working Group.

X indicates that no Blue Night Network (BNN) route is currently servicing this area.
