

Lyft, Canada Inc. PTC Remittance Plan for the Zero-Emission Grant Program of the City of Toronto

Lyft, Canada Inc. (“Lyft”) is excited to participate in the Zero-Emission Grant Program of the City of Toronto (“the City”), which will provide drivers an additional grant payment for each trip they perform in a zero emission vehicle (“ZEV”).

Driver Payments

- Drivers with eligible vehicles will be automatically enrolled in the program.
- Every eligible ZEV driver will receive grant payments for eligible rides completed in a given calendar month no later than 30 days after the completion of that calendar month.
- Drivers who change vehicles will receive any grants they are eligible for. Lyft will identify each completed ride and whether the vehicle is classified as a ZEV based on the engine classification. Therefore, a driver who switches frequently between a ZEV and non-ZEV vehicle would receive the correct remittance for completed ZEV rides.
- Drivers who are suspended or whose PTC licenses are not renewed will still receive any grants they were eligible for prior to the suspension or expiration of their PTC license.

Driver Payment Support

- If a driver has questions regarding their payment amounts for rides completed in a ZEV, they can reach out to Lyft Support. Drivers will be asked to provide the VIN of the vehicle so that Lyft can investigate.
