

## **Speed Bumps - Pantelis Kalamaris Lane, between John Street and Elsmere Avenue**

**Date:** January 3, 2024

**To:** Etobicoke York Community Council

**From:** Director, Traffic Management, Transportation Services

**Wards:** Ward 5, York-South Weston

### **SUMMARY**

---

This staff report is about a matter that Community Council has delegated authority from City Council to make a final decision.

Transportation Services is recommending the installation of speed bumps in Pantelis Kalamaris Lane, between John Street and Elsmere Avenue.

### **RECOMMENDATIONS**

---

The Director, Traffic Management, Transportation Services recommends that:

1. Etobicoke York Community Council authorize the installation of speed bumps in Pantelis Kalamaris Lane, between John Street and Elsmere Avenue, at the locations shown on Attachment 1, Drawing TC-224 dated December 2023 attached to the report entitled "Speed Bumps - Pantelis Kalamaris Lane" from the Director, Traffic Management, Transportation Services.

### **FINANCIAL IMPACT**

---

The estimated cost for the installation of three speed bumps is \$2500.00. Funding would be subject to availability and competing priorities within Transportation Services interim 2024 Operating Budget.

### **DECISION HISTORY**

---

This report addresses a new initiative.

## **COMMENTS**

---

At the request of the Ward Councillor, Transportation Services reviewed the feasibility of installing speed bumps in Pantelis Kalamaris Lane.

This laneway operates one-way northbound with an unposted speed limit of 30 km/h and parking is prohibited at all times.

City Council has established eligibility guidelines for the installation of speed bumps in public laneways based on the following criteria:

- traffic volume (more than 100 vehicles per day);
- vehicular speed (average greater than 20 km/h); and
- frequency of pedestrian use (not numerically quantified).

Laneways meeting one or more of the above three criteria are eligible for the installation of speed bumps.

A site investigation and volume/speed survey conducted on October 13th, 2021 by Transportation Services determined the following:

- traffic volume was approximately 464 vehicles per day;
- average vehicle speed was 22 km/h; and
- moderate pedestrian use was observed.

As the subject laneway meets the installation criteria, the installation of speed bumps is recommended.

The proposed locations of the speed bumps are shown in Attachment 1.

The Ward Councillor has been advised of the recommendation in this report.
