Dear Infrastructure and Environment Committee,

Re: Project design changes to Superior Ave based on new public feedback

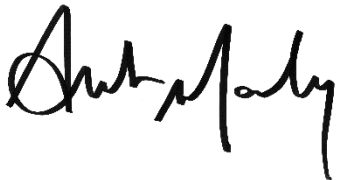

The residents of Superior Ave have brought a petition to the attention of my office regarding the on-street redesign work on the portion of Superior Avenue between Lake Shore Boulevard West and Stanley Avenue. They have voiced important and reasonable concerns regarding the design and consultation process and have organized to urge the local Councillor to champion new design options for this portion of roadwork. The project was approved through City Council as part of IE4.3 Cycling Network Plan - 2023 Cycling Infrastructure Installation - Third Quarter Updates, prior to the community engagement for the Mimico Neighbourhood Mobility Plan.

I have met with the residents to discuss options and worked closely with City staff assigned to this project to propose solutions based on their input and consultation.

Motion:

City Council request that the General Manager, Transportation Services, as part of the approved Superior Avenue: Mimico Neighbourhood Mobility Plan project, implement adjustments to the project design based on new public feedback that continues to support reducing motor vehicle speeds and includes the addition of on-street parking; and after a standard review period, publish before and after motor vehicle speed data and to implement safety adjustments to the project if necessary, in consultation with the local Councillor.

Thank you for your consideration,

Deputy Mayor Amber Morley
City Councillor, Ward 3, Etobicoke-Lakeshore
