

### **APPENDIX 3: ELECTRIC VEHICLE STRATEGY OBJECTIVES (ADOPTED 2020)**

---

The Electric Vehicle Strategy, adopted by Council in 2020 provided direction on the actions the City will take to:

- Increase charging availability by exploring & leveraging funding opportunities, developing policies & regulations, and exploring partnerships, and exploring options to integrate technologies & streamline installations.
- Address cost and convenience barriers by developing policies to increase EVs in shared mobility and exploring regulatory changes & pilots.
- Increase public awareness and education by advocating to other levels of government, communicating social, environmental, and economic impacts of EVs, and continuing to transition City's fleet to zero emission vehicles.
- Create economic opportunities that will benefit the local economy through support for EV related research, and promotion of economic benefits of EV technology.
