RE: IE14.3 Include the Scarborough West Trail in the Cycling Network Plan

Members of the Infrastructure and Environment Committee,

I urge you to include the Scarborough West Trail in the Cycling Network Plan (IE14.3) and ensure the resources are provided to complete this project quickly.

City staff recommend to not move forward with this project at this time.

This path has been promised multiple times for over 50 years and has overwhelming support from the community. This community cannot be told again, "not at this time."

This area of the city stands out on maps of the current and proposed cycling network. It is a part of Toronto lacking infrastructure for active transportation. The proposed trail is a rare example of collaboration and unanimous support from both active transportation advocates and community members less supportive of cycling infrastructure.

This infrastructure is essential to Toronto's commitments to equity, addressing climate change, and expanding safe cycling and walking across the city. The reasons given by staff for not proceeding are not insurmountable barriers, but rather will require political will and allocation of resources.

Thank you for your work for a better and safer Toronto.
