Subject: IE(14.3) Include the Scarborough West Trail in the Cycling Network Plan

Members of the Infrastructure and Environment Committee

Reasons Scarborough residents need the West Scarborough Rail Multi-Use Path:

- TTC buses in Scarborough DO NOT arrive at 10 minute intervals as recently indicated by a City Councillor at the May 23, 2024 Council meeting.
- dependable higher order transit is scarce or non- existent in Scarborough
- higher order transit to service the Scarborough housing intensification presently happening will not happen in Scarborough within decades if ever
- promises of higher order transit are made however never come to fruition
- **Scarborough needs alternatives for moving throughout the city**

The West Scarborough Rail Multi-Use Path is an answer for pedestrians and cyclists!

Cyclists and pedestrians need the West Scarborough Rail Multi-use Path!

The West Scarborough Rail Multi-Use Path will utilize land that exists in a manner that provides **“connections for people!”**

I urge you to include the West Scarborough Rail Multi-Use Path in the Cycling Network Plan (IE14.3) and ensure the resources are provided to complete this project quickly.
