Re: Speed Hump Installation – Beatrice Street, between College Street and Montrose Avenue

Monday, December 2, 2024

Dear Toronto and East York Community Council members:

Residents on Beatrice Avenue are frustrated by frequent speeding on their street by cut through traffic which endangers pedestrians and cyclists. They have requested the installation of speed humps, which Transportation Services agree would be feasible. Several streets in the surrounding area have benefited from the traffic calming effects of speed humps, and residents are eager to see them installed on Beatrice Street.

RECOMMENDATIONS:

It is recommended that:

1. Toronto and East York Community Council authorize the installation of traffic calming (speed humps) on Beatrice Street, between College Street and Montrose Avenue
2. Toronto and East York Community Council direct the City Solicitor to prepare a by-law to alter the roadway on Beatrice Street, between College Street and Montrose Avenue, to install five speed humps, generally as shown on the attached Drawing Nos. TC-428 and TC-429 dated November 2024 from the Director, Traffic Management, Transportation Services.

Sincerely,

A handwritten signature in black ink that reads "D Saxe". The signature is fluid and cursive, with the first name "D" and last name "Saxe" clearly legible.
