The accompanying notes and appendices are an integral part of these consolidated financial statements.

# Notes to the consolidated financial statements

For the year ended December 31, 2024

## 1. Significant accounting policies

The City of Toronto Consolidated Trust Funds (Trust Funds) consist of various trust funds administered by the City of Toronto (City) as well as those within organizations that are accountable to the City. The Trust Funds' consolidated financial statements are the representation of management and have been prepared in accordance with the Chartered Professional Accountants of Canada's Public Sector Accounting Standards, except that investments are recorded at fair value to reflect their ability to support the purpose for which they were created. The Trust Funds are not subject to income taxes under Section 149 (1) of the Income Tax Act (Canada). The significant accounting policies are summarized below.

### a. Revenue recognition

The Trust Funds follow the restricted fund method of accounting for contributions. The City ensures, as part of its fiduciary responsibilities, that all funds received with a restricted purpose are expended for the purpose for which they were provided. For financial reporting purposes, the Trust Funds are all classified as "restricted" and are to be used only for the specific purposes as specified by each trust agreement.

Investment income includes dividends, interest and realized and unrealized gains and losses and is included in the consolidated statement of operations and changes in fund balances.

### b. Financial instruments and investment income

Investments consisting of government and corporate bonds, equity funds, debentures and short-term instruments of various financial institutions are authorized investments pursuant to the provisions of the Municipal Act.

All financial instruments must be classified in accordance with the significance of the inputs used in making fair value measurements. The fair value hierarchy prioritizes the valuation techniques used to determine the fair value of a financial instrument based on whether the inputs to those techniques are observable or unobservable:

- i. Level 1 – Derived from quoted prices (unadjusted) in active markets for identical assets or liabilities.
- ii. Level 2 – Derived from quoted prices for similar assets and liabilities, quoted prices in markets that are not active, or models using inputs that are observable.

- iii. Level 3 – Derived using discounted cash flow methodologies or similar techniques and at least one significant model assumption or input is unobservable.

The fair value of the Trust Funds' investments as at December 31, 2024, are Level 1 and Level 2.

The Trust Funds' investment activities expose it to a range of financial risks, including market risk, liquidity risk, and credit risk. The value of investments recorded in the consolidated financial statements is the fair value determined as follows:

- i. Short-term investments are comprised of money market instruments, such as bankers acceptances and are valued based on cost plus accrued income, which approximates fair value.
- ii. Publicly traded bonds and debentures are determined based on the latest bid prices.
- iii. Equity Funds are valued based on quoted prices (unadjusted) in active markets for identical assets or liabilities.

Transactions are recorded on a settlement date basis. Transaction costs are expensed as incurred.

### c. Expenses

Expenses are recognized on an accrual basis of accounting based on the receipt of goods or services and the creation of a legal obligation to pay.

Distributions, withdrawals from, and management fees for investments held in trust for the Toronto Atmospheric Fund are recorded as expenses in the period incurred in the consolidated statement of operations and changes in fund balances.

## 2. Use of estimates

The preparation of these consolidated financial statements requires management to make estimates and assumptions that affect the reported amount of assets, liabilities and surplus/loss at the reporting date and the reported amount of revenues and expenses during the reporting period. Actual results could differ from those estimates.

## 3. Due from City of Toronto

As at December 31, 2024 the Trust Funds have amounts due from the City of Toronto of \$12,190 (2023 - \$13,925) for investment and banking transactions, since the City maintains bank accounts or holds investments on behalf of the Trust Funds. These amounts are non-interest bearing and are due on demand.

#### 4. Investments

Investments consist of the following:

	2024		2023	
	Fair value	Book value	Fair value	Book value
Short-term investments	\$ 6,441	\$ 6,300	\$ 6,573	\$ 6,394
Mutual fund investments	71,726	56,387	83,323	64,125
<b>Total investments</b>	<b>\$ 78,167</b>	<b>\$ 62,687</b>	<b>\$ 89,896</b>	<b>\$ 70,519</b>

  

	2024	2023
Weighted average rate of return	6.59%	6.07%
Range of maturity dates	2025-2034	2024-2034
Excess of fair value over book value	\$ 15,480	\$ 19,376

#### 5. Investment income

	2024	2023
Investment income	\$ 7,708	\$ 215
Interest income	1,686	1,027
Unrealized (loss) gain on change in fair value (Note 7)	(628)	8,553
<b>Total investment income</b>	<b>\$ 8,766</b>	<b>\$ 9,795</b>

#### 6. Risk exposure

The Trust Funds are subject to market risk, credit risk, liquidity risk, and interest rate risk with respect to their investment portfolio. The Trust Funds' interest bearing investments are exposed to interest rate risk. The Trust Funds' investments are at risk due to fluctuations in market prices whether changes are caused by factors specific to the individual investment or market conditions affecting all securities traded in the market. Unrealized gains and/or losses accounting for the valuation changes between fair value and book value of investments are recognized as part of the Trust Funds' consolidated statement of operations and changes in fund balances.

Market risks include exposure arising from holdings of foreign currency denominated investments and equity prices. The Trust Funds' reporting currency is Canadian dollars. A decrease in the relative value of the Canadian dollar as compared to the US dollar will result in an increase to the Trust Funds' US dollar investments. An increase in the relative value of the Canadian dollar as compared to the US dollar will result in a decrease to the Trust Funds' US dollar investments.

Equity price risk is the risk that the fair value or future cash flows of an equity financial instrument will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument, or its issuer, or factors affecting all similar financial instruments traded in the market. The Trust Funds manage risk by investing across a wide variety of asset classes and investment strategies.

The Trust Funds hold investments in fixed income securities issued by corporations and government entities and as such have fixed income credit risk. The Trust Funds mitigate this risk by limiting the investment portfolio to investments in BBB grade or higher.

#### 7. Capital management

In managing capital, the Trust Funds focus on liquid resources available for reinvestment. The Trust Funds' objective is to have sufficient liquid resources to meet payout requirements. The need for sufficient liquid resources is considered in the investment process. As at December 31, 2024, the Trust Funds have met their objective of having sufficient liquid resources to meet their current requirements.

#### 8. Comparative information

Certain comparative information has been reclassified to conform with the consolidated financial statement presentation adopted in the current year.
