

**July 16 2025**

**Dear Mayor Chow**

**Elbows up ! No 51 State !**

**Yes I support Canadian products , Buy Canadian..**

**Extend the Tax Breaks for Industrial and Companies that are into manufacturing of Canadian Product to confront the Tariffs , Please do help those people from laying off their staff**

**I am doing my best but I live in a fix income Mayor Chow**

**Are Canadian products affordable for Poor People? ..Generally, it depends. Some Canadian products might be more expensive, particularly those requiring more labor or with limited production, while others can be competitively priced or even cheaper than their international counterparts. Affordability also varies by product category and brand.**

**I support Mayor Chow plans to help Business / Workers , and my strong support for the plans to help mitigate the burden of residents that live on a fix income like people living with disabilities ( currently there are no plans)**

**Groceries prices are going up and we are not able to afford those increases unless the City would subsidy the high cost of food and utilities not to forget RENTS are sky high and low employment chances for people with Mental**

## **Health Disabilities**

**Perhaps you could ask our PM Carney or our Premier Doug Ford in one of your meetings, not to forget the vulnerable people caught on this Trade War that we did not created it and maybe TAX the RICH accordingly eh?**

**Or Divest the Toronto Police ? so we can have more funding for Our City's Social Development Plan following the good year of 2023 when Regent Park did not have a single resident lost to Gun Violence , Bill 6, This Year People living in Encampments will be CRIMINALIZED for sleeping in City Parks , Bill C 5 and 5 are a serious issue in our Indigenous Community and We have seen the Violence of the TPS at a rally organized by the PYM For Palestine, in a so called "Bubble Protest Zone" 11 of my Comrades were arrested by Toronto Police with extreme Violence**

**Sincerely**

**Miguel Avila Velarde**

Signed Electronically
