

**Date:** May 27, 2025

## **Addressing Evictions through Disaggregated Race-Based Data in Social Housing**

**To:** Confronting Anti-Black Racism Advisory Committee

### **Summary:**

The Ombudsman Toronto report (Item CC30.3, May 22, 2025) underscores gaps in tenant protection in multi-tenant homes, disproportionately affecting Black, Indigenous, and racialized residents. Disaggregated race-based data collection is essential for identifying systemic barriers and informing equitable housing policy. CABRAC has a mandate to advance data-driven approaches that address anti-Black racism.

### **Recommendation:**

That the Confronting Anti-Black Racism Advisory Committee recommends that:

1. Economic and Community Development Committee request the Confronting Anti-Black Racism Unit, Social Development, Finance and Administration to invite Toronto Community Housing to provide a presentation on initiatives to collect and analyze disaggregated race-based data on evictions, arrears, and tenant relocations.
2. Economic and Community Development Committee request the Confronting Anti-Black Racism Unit, Social Development, Finance and Administration to invite Toronto Community Housing, the Human Rights Office, People and Equity, and the Housing Secretariat to provide a presentation by Q1 2026 on initial findings and recommendations for systemic reforms on social housing.
3. Request the Confronting Anti-Black Racism Unit, Social Development, Finance and Administration to incorporate housing justice and data equity as core priorities in the Confronting Anti-Black Racism Advisory Committee's Work Plan.

Sincerely,

Walied Khogali Ali
