**City of Toronto**

General Government Committee  
City Hall, 100 Queen Street West  
Toronto, Ontario M5H 2N2

Attention: Chair and Members of the Committee

**RE: WSP Canada Submission – General Government Committee Report on Supplier Review**

Dear Chair and Members of the Committee,

WSP Canada Inc. (“WSP”) appreciates the opportunity to provide this correspondence for the record and to express our views regarding the report submitted by the Chief Procurement Officer and the Chief Engineer and Executive Director of Engineering and Construction Services. I am also pleased to be able to make a deputation at the General Government Committee on October 23<sup>rd</sup>.

We wish to begin by recognizing the professionalism, diligence, and fairness of the review process undertaken by City staff. The report presented to the Committee is balanced, thorough, and evidence-based. WSP is pleased with its findings and the confidence it reflects in our continued relationship with the City.

WSP and the City of Toronto have enjoyed a long-standing partnership spanning decades. We are proud to have supported the City in delivering infrastructure that improves mobility, strengthens communities, and supports Toronto’s growth and sustainability objectives.

WSP is a proudly Canadian company, headquartered in Montreal, and one of the world’s leading engineering and professional services organizations. Across Canada, we employ over 13,000 professionals, including more than 2,500 based in the Greater Toronto Area, who design and deliver projects that serve this city and its residents every day. Toronto is both our largest municipal client and the community in which many of our employees live and work.

At present, WSP has over 170 active projects underway with the City, spanning almost every division—from transit planning and bridge rehabilitation to flood protection, parks, and housing-related infrastructure. Our teams are proud of the outcomes these projects have achieved. The Bloor Street Reconstruction Project, recipient of the Canadian Consulting Engineers Award of Excellence, and the City’s Watermain Rehabilitation Program, the largest of its kind in North America, both exemplify what can be accomplished through strong public–private collaboration.

We recognize that large-scale infrastructure projects can occasionally give rise to challenges. WSP's approach is always to address such matters directly, transparently, and in a manner that supports our partners and clients' long-term interests. Our ongoing discussions with City representatives regarding the Gardiner Expressway project continue in this cooperative spirit, focused on progress and working together.

Looking forward, WSP is committed to strengthening what has long been a productive partnership. We will continue to prioritize open communication, proactive engagement with City divisions, and an unwavering focus on quality, accountability, and timely project delivery.

As Toronto grows, the demand on its infrastructure will continue to expand. Meeting those needs will require trusted, experienced partners who understand the City's systems, priorities, and communities. WSP is proud to be one of those partners, and we remain fully committed to supporting the City of Toronto in delivering infrastructure that is resilient, efficient, and ready for the future.

We thank the Committee for its consideration of this correspondence and for the opportunity to reaffirm WSP's commitment to the City of Toronto.

Yours sincerely,

**WSP Canada Inc.**
