

Schedule 2: Chapter 846 Proposed Bylaw Amendments

As stated in the staff report, proposed amendments to Chapter 846, Waste Management Facility, are:

1) To add a provision that delegates various general authorities to the General Manager, Solid Waste Management Services:

- Determining the hours of operation of the services to be provided;
- Designating collection points for categories of waste which are eligible for drop-off;
 - Modifying the list of Recycled Materials, Yard Waste, and Organic Materials in Schedule A to Chapter 846 as needed to align with industry best practices or comply with all applicable laws and policies;
 - Provide information and services with respect to the acceptance and handling of items on Schedule A and Schedule B at Waste Management Facilities.;
- Allowing for closure of some or all Waste Management Facilities in the event of inclement weather or other condition which renders the provision of the services unsafe for a specified period of time; and
- Establishing such other things as are necessary for the proper administration of Chapter 846.

2) To add a definition of "Household Hazardous Waste" (as currently exists in Chapter 844) and update the definition of "Transfer Station."

These definition changes are needed for the City's Waste Management Facilities to accept certain prohibited waste at sites approved under [Ontario Regulation 347: General - Waste Management](#) and that the current language in Chapter 846 does not support.

3) To authorize the General Manager, Solid Waste Management Services to act on behalf of the City of Toronto with respect to management and operations for closed landfills (sometimes referred to as "old landfills") located on lands owned by the City of Toronto.

This authorization needs to be explicitly stated in the Code to enable Solid Waste to act on and provide undertakings for opportunities and related matters that arise for the City's closed landfills. This authority is intended to take priority over any earlier authorizations provided by Council resolution with respect to management and operation of closed landfills.
