Re: IE21.4 - Transitioning Towards Zero-Emission Outdoor Power Equipment

Members of the Infrastructure and Environment Committee,

Don Valley West for Environmental Action is a group of Ward 15 residents working to build a greener, sustainable future for Don Valley West through community engagement and education.

We strongly support a total ban of 2-stroke gas engine powered outdoor equipment as described in option B.

Thank you for your consideration.

Respectfully,

Jonathan Dostrovsky
On behalf of Don Valley West for Environmental Action
