Re.: IE22.4, Bayview/Sutherland Crossing

**Dear Infrastructure and Environment Committee Chair Fletcher
And Committee Members:**

On behalf of the Leaside Residents Association I am writing to support the above item. We appreciate the attention and time devoted by Transportation Services and Traffic Management to increase the safety of what has long been a dangerous location for pedestrians, cyclists, and drivers, as described in the staff report.

The LRA requests your support to install an Intersection Pedestrian Signal (IPS) at this intersection.

We also request your support for Item IE22.4's staff-proposed IPS installation on Bayview Avenue at Parkhurst Boulevard, an accident-scene waiting to happen.

We suggest NYCC recommend a consultation session with nearby residents, prior to construction, to inform and consider residents' questions regarding specific details such as IPS timing count-downs, exact location of the IPS at each intersection, signage on Bayview at Sutherland, or any potential changes to the present TTC Route 88 bus stop location.

Thank you for your attention to this matter.

Sincerely, 

**Carol Burtin Fripp,
Co-Chair with Geoff Kettel,
Leaside Residents Association**
