Dear Council,

I urge you to support this motion to speed up our streetcars and LRTs.

We've seen how bad Line 6 has been running without Signal Priority. A route that's supposed to take 34 minutes one way should not take up to an hour.

Right now, three left-turning cars have priority over streetcars and LRTs with hundreds of people.

World-class European cities give their streetcars priority over cars, because they know viable alternatives to driving is the **ONLY** solution to car traffic.

Toronto urgently needs alternatives to driving since our traffic is among the worst in the world.

Right now, the slow Finch LRT is not a viable alternative.

By approving this motion, we can maximize the potential these transit routes have, and get more people out of cars and on to transit.

This will help get people out of cars, freeing the roads for those who absolutely need to drive.

Transit riders vote, and there is a municipal election in less than a year. If you want us to vote for you, please support these policies that will improve our lives.
