

## **Traffic Calming (Speed Humps) - Glen Park Avenue**

**Date:** November 19, 2025

**To:** North York Community Council

**From:** Director, Enforcement and Street Management, Transportation Services

**Wards:** Ward 8 - Eglinton Lawrence

### **SUMMARY**

---

This staff report is about a matter that Community Council has delegated authority from City Council to make a final decision.

Transportation Services is recommending the installation of speed humps on Glen Park Avenue, between Danesbury Avenue and Capitol Avenue. Staff's assessment indicates the criteria as set out in the Traffic Calming Policy has been satisfied. Therefore, speed humps should be installed on Glen Park Avenue, between Danesbury Avenue and Capitol Avenue.

### **RECOMMENDATIONS**

---

The Director, Enforcement and Street Management, Transportation Services recommends that:

1. North York Community Council authorize the installation of Traffic Calming (3 speed humps) on Glen Park Avenue, between Danesbury Avenue and Capitol Avenue, generally as shown in Attachment 2, Drawing No. TC-606, dated October 2025 from the Director, Enforcement and Street Management, Transportation Services.

### **FINANCIAL IMPACT**

---

The estimated cost for installing three (3) speed humps on Glen Park Avenue, between Danesbury Avenue and Capitol Avenue is \$12,000. Funding is subject to availability and competing priorities within the Transportation Services 2026 Capital Budget.

## **DECISION HISTORY**

---

This report addresses a new initiative.

## **COMMENTS**

---

Transportation Services received a request from the Ward Councillor, on behalf of area residents, to investigate the feasibility of installing speed humps on Glen Park Avenue, between Danesbury Avenue and Capitol Avenue. The residents are concerned that motorists travel at a high rate of speed on Glen Park Avenue.

### **Existing Conditions**

Glen Park Avenue is characterized by the following conditions:

- It is a two-lane, east-west, local roadway
- It operates two-way traffic on a pavement width of approximately 8.5 metres
- The daily two-way traffic volume is approximately 2,120 vehicles
- The speed limit is 40 km/h
- Heavy trucks are prohibited at all times
- There is no Toronto Transit Commission (TTC) service provided
- There is sidewalk located on the north side of the street

Vision Zero, as part of the road safety plan, approved 30 km/h speed limits for all local streets in this area. However, at the time that this report was prepared the required signage has not been installed. The required signage will be installed as scheduling and budget permits.

The land use in the area consists of detached residential dwellings. This subject section of Glen Park Avenue is not within designated Community Safety Zone.

A map of the area and proposed locations of the speed humps is included in Attachment 2.

### **Study Results**

As part of the assessment of the warrant criteria, a vehicle speed and volume study was conducted on Glen Park Avenue, between Danesbury Avenue and Capitol Avenue, from June 10-12, 2025.

The study results on Glen Park Avenue, between Danesbury Avenue and Capitol Avenue disclosed the following:

- 24-hour total vehicle volume is 2,115 vehicles
- The block length from Danesbury Avenue and Capitol Avenue is 240 metres

- The operating speed, which is the speed at which 85 percent of traffic is travelling at or below, was observed at 45 km/h
- The 95th percentile speed, which is the speed at which 95 percent of traffic is travelling at or below, was observed at 50 km/h

Based on the study results, Glen Park Avenue, between Danesbury Avenue and Capitol Avenue has satisfied the warrant criteria for both minimum block length and minimum vehicle speed. The block length was greater than 120 metres, the operating speed is more than 8 km/h over the warranted speed of 30 km/h, and the 95th percentile speed is more than 15 km/h over the warranted speed of 30 km/h.

The overall investigation concluded that the eligibility and warrant criteria as outlined in the updated Traffic Calming Policy has been satisfied. Therefore, staff recommend the installation of speed humps on Glen Park Avenue, between Danesbury Avenue and Capitol Avenue.

### **Relative Priority and Other Impacts**

In the event that the number of approved requests for roadway traffic calming measures exceed the budget allocated for installation, funding for approved installations will be prioritized using a Prioritization Score. This score is made up of a Quantitative Score and a Qualitative Score.

The Quantitative Score is based on the results of the data collection, including travel speeds and traffic volumes to prioritize locations with higher vehicle speeds and volumes.

The Qualitative Score includes:

- Collision history to prioritize locations with a history of serious injury or fatal collisions and those involving a pedestrian or person cycling
- Equity to prioritize equity-deserving communities with a high-concentration of priority populations and those that are transportation disadvantaged
- Expected presence of vulnerable road users (elderly population, school children and pedestrians, including transit riders) to prioritize locations with a higher risk of fatal and serious injury collisions

The Quantitative and Qualitative Scores are averaged to provide the complete Prioritization Score. Glen Park Avenue, between Danesbury Avenue and Capitol Avenue, scored 53 ranking points out of a possible 100.

No alterations to parking regulations will be required, nor will the number of parking spaces be affected by the installation of speed humps. Installation of speed humps will have minimal effect on winter services, street cleaning and garbage collection.

## Consultation with Emergency Services

Consultation with emergency services (Toronto Police Service, Toronto Fire Services and Toronto Paramedic Services) is required to ensure that the design and layout of a traffic calming proposal does not unduly affect their operations. Emergency services were advised of this proposal.

Toronto Paramedic Services have provided their comments and advised of potential delays in emergency responses but expressed support for initiatives that enhance community safety. A copy of the full response is included as Attachment 3. Toronto Fire and Toronto Police Service have not provided comments back at the time of writing this report. Installing speed humps will result in slower operating speeds for all vehicles, including emergency service vehicles.

The Ward Councillor has been advised of the recommendations in this report.

### Attachment 3: Memo from Toronto Paramedic Services, dated October 10, 2025

**From:** EMS Planning <emsplanning@toronto.ca>  
**Sent:** October 10, 2025 3:46 PM  
**To:** Temitope Oyeyemi <Temitope.Oyeyemi@toronto.ca>  
**Cc:** Atif Sharif <Atif.Sharif@toronto.ca>; EMS Planning <emsplanning@toronto.ca>  
**Subject:** RE: Speed Humps - Glen Park Avenue, between Danesbury Avenue and Capitol Avenue

Hi Temitope,

We have received and reviewed the proposal for installation of speed humps on Glen Park Avenue, between Danesbury Avenue and Capitol Avenue, with the following comments:

The installation of speed humps on Glen Park Avenue, between Danesbury Avenue and Capitol Avenue, will impact response and transport times for residents that reside on the roadway speed humps are installed. Impacts may extend to community members if Glen Park Avenue, between Danesbury Avenue and Capitol Avenue, serves access to other roadways. It is important that the applicant understands that the installation of traffic calming devices will reduce the speed that emergency vehicles travel when responding to emergencies on roadways where they are installed.

Toronto Paramedic Services is supportive of community initiatives that improve the safety of all citizens of, and visitors to, the City of Toronto. Traffic and pedestrian safety are key components of a healthy neighbourhood, and we endeavour to support the wishes of the community to implement measures to improve upon these components.

**Subject:** Speed Humps - Glen Park Avenue, between Danesbury Avenue and Capitol Avenue

Hello All,

At the request of Ward 8 Councillor, Mike Colle, we investigated the feasibility of installing speed humps on Glen Park Avenue, between Danesbury Avenue and Capitol Avenue. Our investigation results disclosed that Glen Park Avenue meets the minimum criteria for the installation of speed humps based on the updated City of Toronto Traffic Calming Policy.

The technical warrant and proposed location plan are attached.

At this time, we are requesting for comments from Emergency Service agencies which will be included in a staff report to an upcoming meeting of the North York Community Council. Please, advise if the design and layout of speed humps on Glen Park Avenue, between Danesbury Avenue and Capitol Avenue, would adversely affect your operations.

Should you have any questions or concerns, please, let me know.

Regards,

**Temitope Oyeyemi**
