Toronto, ON M2N 5V7

Dear Members of the North York Community Council,

My name is Norman Osokin, and I am writing on behalf of Kids Coding School where I serve as the Director. Our organization provides accessible and high-quality STEM education to all children by offering hands-on learning across the GTA.

We have been engaged with Northcrest Developments over the past , providing community programming services during their Weekends @ YZD event series. From the start, Northcrest has shown a clear interest in working alongside local organizations and understanding how their efforts can complement the work already happening in the community.

We support the application for the Hangar District because we have seen how Northcrest works to include members of the public involved in their engagement process. They invest time and resources in the local community and ensure that feedback received is incorporated in the plan as it evolves. They support the day-to-day efforts of local organizations like ours and help create space and capacity where it is needed most.

The Hangar District reflects what we believe is possible when development is done right. We are looking forward to the benefits this plan can bring, including new community spaces and programming for youth.

This work has already created opportunities for connection and collaboration with community and with the approval of this application, we believe even more doors can open. It will provide a platform for continued partnership, stronger infrastructure for community work, and a chance to make North York a place where more people can thrive.

Our experience with Northcrest has been shaped by openness and mutual respect. Their team makes time to listen, to learn, and to understand the needs and values of organizations like ours and they approach partnerships with humility and care.

Thank you for the opportunity to share our support. Please feel free to contact me directly with any questions or additional reference.

Sincerely,
Norman Osokin
