

Attachment 9: Draft Zoning By-law Amendment (Multiplexes)

Authority: Planning and Housing Committee Item PH###.##, as adopted by City of Toronto Council on [insert date of Council adoption of this By-law]

Explanatory Comment:

The purpose of this zoning by-law amendment is to align the City of Toronto's Zoning By-law with Ontario Regulation 462/24, which aims to encourage gentle intensification and simplify permissions for low-rise housing, such as duplexes and triplexes, across the province. To apply these changes within Toronto's planning context, the Zoning By-law will be updated to extend these permissions to a broader range of housing types, including all multiplexes. This builds on the provincial changes by expanding the lot coverage allowance to a greater number of units, aligning more closely with existing permissions in Toronto's residential zones.

The amendment provides for a maximum lot coverage of 45% for all multi-unit buildings and structures on lots where current lot coverage permissions are lower.

The amendment also removes Floor Space Index (FSI) limits for residential buildings with secondary suites, consistent with the provincial regulation. While Toronto currently exempts multiplexes from FSI limits, secondary suites are classified as "living accommodations" rather than "dwelling units," and are therefore included in the FSI maximum. This change will allow secondary suites to benefit from the same FSI exemptions, reducing barriers to adding additional units within existing homes all while being consistent with the provincial requirements.
