

## Petition in support of TransformTO Net Zero Strategy from Residents

Letter to Toronto City Council

We the undersigned recognize the importance of the success of the TransformTO Net Zero Strategy for the continued existence of all living beings. We encourage all members of Toronto City Council to make the Strategy's 2026-2030 Action Plan the most robust it can be. They must approve goals for 2030 in each of the sectors that set us up to reach net zero by 2040 AND ensure there is money in the budget to make these goals a reality.
