To Whom It May Concern,

I am a longstanding resident of Enroutes Street in Toronto's East End. I have recently received a letter in the mail regarding the displaying of a third party electronic ground signage for an EV charging station within 250 metres of our home. I would like to strongly present my opinion against the proposed signage.

In the past, when different commercial companies were occupying the said space and displaying their logo / signage, we experienced considerable inconvenience during the night. The light from the signage was prohibitively bright and streamed directly towards our bedroom making it very difficult to have a restful sleep. Even with the blinds drawn, the intensity of the glaring light remained unreasonably bright. As such, I would kindly request that this signage not be approved by the relevant City of Toronto authorities.

Thank you,

[REDACTED]

Date: October 28, 2025 10:37:50 AM

Hello Team

This is in response of the notice which I have received regarding the proposed sign which is associated an EV charging station structure (Location:3003 Danforth Avenue(25-232922)

I am strongly opposing to place this structure as it is with in 250 meters of my property, Trent avenue and the Danforth avenue as it is now has a lot of issues like narrow road due to bike lanes and bicycle stands, I do not want to see any more signs erected with in this area

Sincerely

[REDACTED]
