RE: Installation of Traffic Calming Measures on Morrison Avenue

Dear Chair and Members of Toronto and East York Community Council,

Morrison Avenue, located between St. Clair Avenue West and Rogers Road, is located in the heart of North Corso and connects hundreds of residents to local shops, schools, parks, and public transit. I have heard from many residents and the North Corso Residents' Association that drivers too often speed excessively down Morrison Avenue, putting them and their families at risk. Residents have also shared their experiences with accidents and near misses as a result of dangerous driving. As this neighbourhood continues to grow, there is an urgent need for traffic calming measures.

In a survey hand-delivered to homes by my office, residents along Morrison Avenue overwhelmingly supported the installation of speed humps as a proposed traffic calming measure. The addition of speed humps will help improve traffic safety for residents living in the area and support existing traffic calming measures on neighbouring streets.

RECOMMENDATIONS

It is recommended that:

1. Toronto and East York Community Council authorize the installation of traffic calming (six speed humps) on Morrison Avenue, between Dufferin Street and Harvie Avenue, generally as shown on the attached Drawings No. TC-619 and TC-619-1, dated November 2025 from the Director, Enforcement and Street Management, Transportation Services.

Sincerely,

Alejandra Bravo
City Councillor
Ward 9, Davenport
