**Subject:** [External Sender] My comments for 2025.TE19.32 on January 14, 2025 Toronto and East York Community Council

**Categories:** Olivia, Communication

To the City Clerk:

Please add my comments to the agenda for the January 14, 2025 Toronto and East York Community Council meeting on item 2025.TE19.32, Summary of Traffic Impacts related to the proposed Ontario Place (955 Lake Shore Boulevard West) Redevelopment

I understand that my comments and the personal information in this email will form part of the public record and that my name will be listed as a correspondent on agendas and minutes of City Council or its committees. Also, I understand that agendas and minutes are posted online and my name may be indexed by search engines like Google.

Comment  
January 13, 2024

Good Day:

Last year was Earth's hottest year in recorded history. Canada has signed international agreements to reduce Carbon Dioxide emissions.

Therme Canada will probably heat its Lake Ontario Water by burning natural gas to Spa Mineral water temperatures for 95 years!

Natural gas devices (furnaces) have been banned in new buildings (except those that provide essential services) several municipalities in the USA and Quebec because they emit Methane.

Methane is 80 times more of a heat trapping gas than is Carbon Dioxide!

Lake Ontario is a navigable waterway and falls under the jurisdiction of the Federal Government. Toronto should pass bylaws based upon and in a separate action launch Injunction proceedings based on the Federal government's **Environmental Assessment Act**, to stop the Therme Canada from commercializing Ontario Place.

For additional environmental reasons to seek an injunction founded on breaches of the Federal Government's **Environmental Assessment Act**, please contact me.

---

A catastrophic fire involving thousands of rubber tires, thousands of liters of gasoline, lubricant oils and plastics contained in 1,900 vehicles parked inside the proposed five level parking garage will burn for days. When the fire starts Oxygen will be rapidly depleted and hundreds of people inside the garage will be killed.

---

A catastrophic fire is on the balance of probabilities is predicted because within the next 95 years unstable lithium battery electric vehicles will be parked amongst fossil fuel vehicles. Large fire trucks will be unable to navigate the ramps and low ceilings of the parking garage.

---

Go to Google and using the key words "Parking Garage Fires" to view how frequently fires occur.
