

Supplemental Report: City-Wide Heat Maps of Red-Light Camera and Parking Violations

Date: July 21, 2026

To: City Council

From: General Manager, Transportation Services

Wards: All

SUMMARY

This report responds to a request from the Audit Committee on July 10, 2026, to report directly to the July 29, 30 and 31, 2026 meeting of City Council with a supplementary report which includes a city-wide heat map showing Red-Light Camera (RLC) infractions and a city-wide heat map showing parking infractions. The term "violation" is used throughout this report in place of "infraction" to align with the Administrative Penalty System terminology.

Two heat maps, based on 2025 data, are attached to this report: one showing the distribution of RLC violations across the City and one showing the distribution of parking violations.

RECOMMENDATIONS

The General Manager, Transportation Services recommends that:

1. City Council receive this report for information.

FINANCIAL IMPACT

There are no immediate financial impacts arising from this report, because it is informational in nature. The information contained in the attached heat maps may support future operational reviews, transportation planning initiatives, road safety assessments, and service delivery considerations. Any financial implications resulting from future Council direction would be identified through subsequent reports and considered through the City's annual budget process.

The Chief Financial Officer and Treasurer has reviewed this report and agrees with the financial implications as presented in the Financial Impact Section.

DECISION HISTORY

At its meeting on July 10, 2026, the Audit Committee adopted a motion on item AU13.8- Audit of the City's Administrative Penalty System for Parking and Red Light Camera Violations, requesting the General Manager, Transportation Services, to report directly to the July 29, 30 and 31, 2026 meeting of City Council with a supplementary report which includes a city-wide heat map showing the amount of infractions found by each of the red-light cameras, and a city-wide heat map showing all of the parking infractions.

COMMENTS

Heat Map of Red-Light Camera Violations

Attachment 1 provides a city-wide heat map illustrating the geographic distribution and concentration of Red-Light Camera (RLC) violations recorded in 2025. The heat map is based on data associated with individual RLC locations and highlights areas where higher numbers of violations were recorded. Some RLC locations became operational partway through the year, therefore, the data associated with those locations represents a partial year of operation.

For additional context, a map identifying all active RLC locations can be found on the City's program webpage at www.toronto.ca/redlightcamera. Annual data on RLC violations is also publicly available on the City's [Open Data Portal](#).

Heat Map of Parking Violations

Attachment 2 provides a city-wide heat map illustrating the geographic distribution and concentration of parking violations issued in 2025.

Parking violation data is collected and maintained by the Toronto Police Service and is publicly available through the City's [Open Data Portal](#). The heat map was developed using available parking violation data in 2025 and provides a city-wide visualization of locations where the highest concentrations of parking violations were recorded.
