City of Toronto

## Re: Item PH28.8 – A Shared Vision to Create More Affordable and Supportive Homes and Sustain Community Networks in South Parkdale

---

Dear Members of Council,

On behalf of the executive leadership team at University Health Network (UHN), I am writing in support of Item PH28.8- A Shared Vision to Create More Affordable and Supportive Homes and Sustain Community Networks in South Parkdale and the adoption of the shared vision and design principles for UHN-owned lands in South Parkdale.

UHN was engaged in the development of this vision alongside various City of Toronto divisions and the broader community. The resulting principles provide a framework to guide future development, including the next phase of Dunn House, and reflect the vision for the future of Social Medicine and supportive housing at UHN.

We recognize the importance of ongoing engagement with local residents and our role in the future development of the lands to provide much needed community centered care.

UHN remains committed to continuing this work in collaboration with the City and community partners, and we look forward to the implementation of this shared vision.

Sincerely,

*Kerri Culver*
