Dear Toronto City Council,

I am writing in support of *2026.EX30.3 - Towards a Beautiful City* and **urging you to take the next step in supporting this vision by upgrading Toronto's bike lanes.**

Toronto has built over 100 km of protected bike lanes since 2016, but many of those lanes were constructed with "quick-build" materials that were never meant to be permanent. They are overdue for a real upgrade.

Every person who has ridden a bike in this city has experienced flexi-posts knocked flat, pinned curbs broken and shoved aside, and potholes that have gone unrepaired for years. Replacing those temporary materials with permanent infrastructure like poured-in-place concrete and low-walls enhanced by StreetARToronto would better blend into the streetscape while still keeping everyone safe.

As identified in item *2026.IE28.1 - Congestion Management Plan - 2026 Spring Update*, bike lanes are part of the tactical pillars to shift how people travel. Making our existing cycling network truly world-class will encourage more people living and working close to existing bike lanes to ride, and put us in a better position to make cycling a safer, more convenient option for more Torontonians across the city.

Please support and invest in Toronto's streets and transportation network.
