I support the unanimously approved motion by Scarborough Council to:

- Pausing Parking Requirement Eliminations in Scarborough until reliable transit infrastructure is established.
- Protecting Neighbourhood Capacity by Creating a bylaw or policy to prohibit new developments from petitioning for on-street residential parking permits.
- Restoring Transit Parking: Exploring options to restore and expand public parking at Scarborough TTC Stations to reduce congestion and support ridership. *(this appears to be Scarborough-specific issue)*

Effective 2022 the City in one motion has created a PARKING CRISIS on our Scarborough streets when it approved the elimination of minimum parking requirements for new developments.

Scarborough continues to experience some significant transit service gaps when compared to other parts of the city. Many neighbourhoods remain highly car-dependent due to limited access to rapid transit, infrequent service, and overall travel times.

When ALL Scarborough Councillors agree together that there is a “PARKING CRISIS ” that needs action, it is common sense that the request is supported by other City Councillors who should not deny the united voice of the elected representatives who know these wards best.

Their support shows they understand that the impact of downtown-style parking assumptions which came with the elimination of minimum parking requirements is now percolating into a “parking crisis” in Scarborough that calls for immediate action to address these critical issues

I support the approval of this important change for Scarborough and thank our Scarborough Councillors for their leadership and commitment to prevent a “PARKING CRISIS” in Scarborough.
