

All-Way Stop Control - Rowntree Mill Road and Apted Avenue

Date: January 30, 2026

To: Etobicoke York Community Council

From: Director, Enforcement and Street Management, Transportation Services

Wards: Ward 7 - Humber River - Black Creek

SUMMARY

This staff report is about a matter that Community Council has delegated authority from City Council to make a final decision.

Transportation Services has reviewed the need for all-way stop control at the intersection of Rowntree Mill Road and Apted Avenue. Based on the assessment undertaken, Transportation Services does not recommend the installation of all-way stop control at this intersection as the warrant criteria was not met.

RECOMMENDATIONS

The Director, Enforcement and Street Management, Transportation Services recommends that:

1. Etobicoke York Community Council not authorize all-way compulsory stop control at the intersection of Rowntree Mill Road and Apted Avenue.

FINANCIAL IMPACT

There is no financial impact resulting from the adoption of the recommendation in this report.

If Etobicoke York Community Council amends the recommendation in this report and authorizes the installation of all-way stop control, the estimated cost associated with the amendment is \$1000.00. Funding would be subject to availability and competing priorities within the Transportation Services 2026 Interim Operating Budget.

DECISION HISTORY

This report addresses a new initiative.

COMMENTS

The Ward Councillor, on behalf of an area resident, requested Transportation Services investigated the feasibility of installing all-way stop control at the intersection of Rowntree Mill Road and Apted Avenue.

Existing Conditions

Rowntree Mill Road is characterized by the following conditions:

- It is a 2-lane, east-west, local roadway
- It operates two-way traffic on a pavement width of approximately 8.5 metres
- The daily two-way traffic volume is approximately 1000 vehicles
- The speed limit is 30 km/h
- Heavy trucks are prohibited at all times
- There is no TTC service provided
- There is a sidewalk on the south side of the roadway

Apted Avenue is characterized by the following conditions:

- It is a 2-lane, north-south, local roadway
- It operates two-way traffic on a pavement width of approximately 8.5 metres
- The speed limit is 30 km/h
- Heavy trucks are prohibited at all times
- There is no TTC service provided
- There are no sidewalks on either side of the street

These two streets intersect to form a T-shaped intersection with right-of-way controlled by a stop sign for southbound traffic on Apted Ave.

A map of the area is included in Attachment 1.

Study Results

In order for all-way stop control to be warranted at an intersection, established criteria must be satisfied. The warrants consist of four components, including: collision history, total vehicle volume, combined vehicle and pedestrian volumes crossing the major road and the percentage of traffic on the major road.

Collision history provided by the Toronto Police Service for the three-year period ending September 2025, disclosed no reported collisions have occurred at this intersection.

Transportation Services conducted an all-way stop control study on October 16, 2025, at the subject intersection. The results of the study were evaluated against the warrant criteria for all-way stop control as adopted by City Council. The evaluation is summarized in Table 1.

Table 1: All-Way Stop Control Study at Rowntree Mill Road and Apted Avenue

No.	Warrant Type	Actual	Required	Satisfied (Yes/No)
A	Number of Potentially Preventable Collisions (2022 to 2025)	0	6	No
B1	Average Vehicle Volumes	102/hour	250/hour	No
B2	Combined Vehicle & Pedestrian Volumes Crossing Major Road (Average)	33/hour	100/hour	No
B3	Percentage of Traffic on Major Street	71%	≤70%	No

In order for the all-way stop control to be technically warranted, either Warrant A must be met or Warrant B1 or B2 combined with Warrant B3 must be achieved. Based on the study results, the technical warrants for the installation of all-way stop control are not satisfied. Therefore, it is not recommended that all-way stop control be installed at the intersection of Rowntree Mill Road and Apted Avenue.

The Ward Councillor has been advised of the recommendation of this staff report.
