

Interim Approach to Address City-Owned Female Ginkgo Trees - 77 Sixth Street

Date: June 18, 2026

To: Etobicoke York Community Council

From: Director, Urban Forestry, Environment, Climate and Forestry

Wards: Etobicoke-Lakeshore - 3

SUMMARY

Environment, Climate and Forestry received an application to remove a City-owned female ginkgo tree (*Ginkgo biloba*) at 77 Sixth Street due to concerns that the tree drops fruit with a foul odour. The City's Tree By-laws do not support the removal of this tree as it is healthy and maintainable.

Following recent City Council direction, this report proposes an interim approach for the management of female ginkgo trees and requests that Etobicoke York Community Council approve a permit to remove one City-owned female ginkgo tree located at 77 Sixth Street on condition that a tree of alternate species be planted as a replacement.

City staff will report back to City Council in early 2027 with recommendations on an approach to the impacts of female ginkgo trees with a focus on community health and safety, as part of the ongoing Tree By-Law Review.

RECOMMENDATIONS

The Director of Urban Forestry, Environment, Climate and Forestry recommends that:

1. Etobicoke York Community Council approve the request for a permit to remove one City-owned tree located at 77 Sixth Street as part of an interim approach to addressing female ginkgo trees in the City of Toronto, so that the City-owned female ginkgo tree will be removed and replaced by the City of Toronto in the road allowance fronting 77 Sixth Street to the satisfaction of the Executive Director, Environment, Climate, and Forestry.

FINANCIAL IMPACT

There are no financial implications resulting from the adoption of this report.

DECISION HISTORY

At its meeting on May 20 and 21, 2026, City Council directed the Executive Director, Environment, Climate and Forestry to provide recommendations on the impacts of City-owned female ginkgo trees with a focus on community health and safety, as part of the ongoing Tree By-Law Review and to report back in 2027.

[Agenda Item History - 2026.MM41.31](#)

At its meeting on March 25 and 26, 2026, City Council adopted the report entitled Tree By-law Review Report. This report recommended that staff would review operational practices to ensure invasive species management and nuisance tree concerns are addressed in a way that balances customer expectations with biodiversity and urban forest protection goals.

COMMENTS

The City of Toronto received an application for a permit to remove one City-owned tree located on the right-of-way fronting 77 Sixth Street. The female ginkgo tree (*Ginkgo biloba*) in question measures 36 cm in diameter. The applicant indicates the reason for requesting removal is that the tree drops fruit with a foul odour.

Ginkgo trees are an excellent urban tree with great attributes such as beautiful fall colour, striking form, large size at maturity, and hardiness. They also contribute to the diversity of the urban forest and are highly disease resistant. The City of Toronto includes male ginkgo trees in its planting program for these positive attributes. The City of Toronto does not knowingly plant the female version, as they produce fruit, which are known to have a noxious odour and can be toxic when handled with bare skin (similar to poison ivy); negative attributes that make these trees unique. City staff are reviewing planting programs and the operational practices of considering tree removal applications for female ginkgo trees as per Council direction. A report back to Council is expected in early 2027 with recommendations on an approach to the impacts of female ginkgo trees with a focus on community health and safety, as part of the ongoing Tree By-Law Review.

In the interim, City staff have determined that on a case-by-case basis it is reasonable to remove a City-owned female ginkgo tree on condition that a tree of alternate species be planted as a replacement.

As such, the Director of Urban Forestry, Environment, Climate and Forestry recommends that;

1) Etobicoke York Community Council approve the request for a permit to remove one City-owned tree located at 77 Sixth Street as part of an interim approach to addressing female ginkgo trees in the City of Toronto. Should Etobicoke York Community Council grant this request for tree removal, the following recommendations may be adopted:

- The City-owned female ginkgo tree will be removed by the City of Toronto
- A new replacement tree will be planted in the road allowance fronting 77 Sixth Street to the satisfaction of the Executive Director, Environment, Climate, and Forestry.
