

# Attachment 1: Pictures and Drawings for the High Rate Treatment Facility

Figure 1 – Construction of the Integrated Pumping Station shafts at Ashbridges Bay Treatment Plant. A twin forcemain will be constructed between the Integrated Pumping Station and the High Rate Treatment Facility for conveyance of wet weather flow.

Figure 2 – Conceptual location of the High Rate Treatment Facility and twin forcemain from the Integrated Pumping Station.

Figure 3 – Newly constructed Landform at the Ashbridges Bay Treatment Plant.

Figure 4 – Conceptual drawing of the High Rate Treatment Facility on the Landform.
