July 16, 2026

Dear Chair and Members of the General Government Committee,

We are writing on behalf of the Beech Hall Housing Co-operative Board of Directors and Membership of Beech Hall. We have been directly impacted by repeated flooding, and we strongly support Item GG31.20.

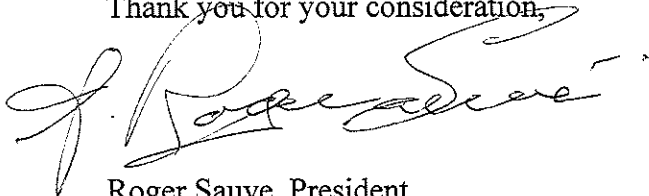

Like many of our neighbours, we have experienced the stress, disruption, and financial burden that comes with basement flooding. Every major rainstorm brings uncertainty and anxiety, leaving families wondering whether our homes will once again be damaged. These flooding events have affected not only our properties but also our sense of security and peace of mind.

For years, residents have been told that improvements were needed to address the limitations of our aging infrastructure. We have participated in consultations, shared our experiences, and patiently waited for meaningful action. This project represents the progress our community has been waiting for.

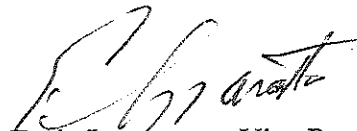

Approving this item will allow this critical infrastructure work to continue moving forward without unnecessary delay. Investing in modern stormwater and sewer infrastructure will help protect homes, reduce the risk of future flooding, and make our neighbourhood more resilient as severe weather events become more frequent.

We respectfully urge the Committee to support this report and ensure this important project proceeds as planned. Residents have waited long enough, and it is time to deliver the improvements our community needs and deserves.

Thank you for your consideration,

Roger Sauve, President
Beech Hall Housing Co-operative
Board of Directors

Ernie Lazzarotto, Vice President
Beech Hall Housing Co-operative
Board of Directors
