Repairs and rehabilitation on Wilson Avenue due to BFPP (21 ECS-LU-04FP) after much of the Wilson Village BIA public realm improvements have been damaged or destroyed.

Dear Members of the Infrastructure and Environment Committee,

Summary

Over many years the Wilson Village BIA invested hundreds of thousands of dollars in wonderful public realm and beautification initiatives along Wilson Avenue. Extra funding was given to these improvements via s 37 contributions. During the implementation of BFPP (21 ECS-LU-04FP) much of the work including garden beds, interlocking brick, decorative sidewalks had been damaged or destroyed. While some disruption was expected this goes beyond the reasonable. Recent attempts to get the restoration work underway have not been overly successful.

Quite frankly, the road and sidewalks and the public realm are a complete mess. After much urging a modest clean up of litter and debris did take place but this has been insufficient. The roadway is severely damaged and years of investment by local businesses is at risk. It is essential that repairs be done immediately. No road closures will be granted after May 26, 2026 due to the opening of the Roger's Stadium concern season which is just down the street.

Recommendation:

That City Council direct the General Manager Toronto Water and the General Manager Transportation to work with the subcontractor which is responsible for any and all repairs in the construction zone on contract BFPP (21 ECS-LU-04FP) in consultation with the Wilson Village BIA and the local Councillor to immediately work to repair and restore damaged infrastructure and have such work completed to a satisfactory level to the Wilson Village BIA no later than May 26, 2026.

Sincerely,

Councillor James Pasternak
