

NOTICE OF MOTION

Update on the Bathurst Quay Neighbourhood Transportation Study

Moved by: Deputy Mayor Malik

Seconded by: Councillor Fletcher

SUMMARY

Through PH29.11 - Impact Assessment of Extended Flightpath at Billy Bishop Airport, a report back was directed to Planning and Housing Committee in Q2 2026 on the prospective impact that expanding the flightpath to accommodate jets at Billy Bishop Airport would have on new housing supply.

Toronto and East York Community Council has previously directed through TE29.69 - Bathurst Quay Neighbourhood Transportation Study a report back on a multi-modal transportation study for this area.

To inform the report back to Planning and Housing Committee on housing impacts, a status of land-side transportation directions and matters related to Billy Bishop Airport and the surrounding area, including a preliminary identification and assessment of transportation impacts and issues, and an overview of the comprehensive analysis that will be included in the multi-modal transportation study, should be included in this report-back.

RECOMMENDATION

1. City Council direct the Chief Planner & Executive Director, City Planning and the General Manager, Transportation Services to report back to the Planning and Housing Committee in Q2 2026, along with the report-back for PH29.11 - Impact Assessment of Extended Flightpath at Billy Bishop Airport, on the current status of land-side transportation directions and matters related to Billy Bishop Airport and the surrounding area, including a preliminary identification and assessment of transportation impacts and issues, and an overview of the comprehensive analysis that will be included in the multi-modal transportation study, directed for Q3 2027 by TE29.69 - Bathurst Quay Neighbourhood Transportation Study.
