Dear Toronto City Council Clerk,

I am writing to request that you support Councillor Cheng's motion entitled "Toronto Needs Provincial Support to Enable Noise Camera Enforcement Now."

I strongly support this motion because the unnecessary revving and backfiring from loud and disturbing vehicles disturbs people in their homes and almost everyone in public spaces. It is a problem in every ward in this city.

Currently, there are not enough police or bylaw officers to enforce this transient and random noise source. Reporting them is difficult, frustrating and almost downright impossible. As Toronto becomes more dense and we welcome more residents into our city, one driver in a loud car can disturb tens of thousands of people at once, negatively impacting everyone's health and quality of life.

Implementing automated noise enforcement would:

- Capture offending driver behaviour without the use of precious city and police resources
- Collect data on the scope and magnitude of the problem
- Identify hot spots for targeted enforcement
- Send the message that this type of behaviour is unacceptable through fines.

Noise cameras are being deployed in other cities, such as New York and Honolulu, and throughout Australia and the UK. We can learn from these implementations and use them to restore urban calm and help residents get a good night of uninterrupted sleep.

To get a noise camera program off the ground at all, Toronto's leaders have demanded before and must keep demanding that the provincial government provide the legislative framework that would allow a noise camera pilot or program to be enacted.

This is a very exciting development with the potential to significantly improve quality of life and public health for Torontonians. **Please vote yes to this motion!**

Thank you,
