To the City Clerk:

Please add my comments to the agenda for the July 29, 2026 City Council meeting on item 2026.MM43.75, Ensuring Due Diligence on Data Centres in Scarborough Southwest - by Councillor Parthi Kandavel, seconded by Councillor Dianne Saxe.

I understand that my comments and the personal information in this email will form part of the public record and that my name will be listed as a correspondent on agendas and minutes of City Council or its committees. Also, I understand that agendas and minutes are posted online and my name may be indexed by search engines like Google.

Please note that I explicitly consent to these comments being submitted on my behalf through Action Network.

Comments:

Dear City Council and Mayor Olivia Chow,
City Council must take immediate action to halt the proposed expansion of the Hyperscale Stack Data Centre in Scarborough, the Microsoft Data Centre in Etobicoke, and all other AI data centres in the GTA until a proper framework is developed and communities are given a voice. Both data centre-related motions put forward today do not go far enough and leave our communities at the whim of these megacorporations. Working Torontonians deserve certainty that our voices matter.

I call upon Mayor Chow and City Council to immediately put forward a motion for a 1-year moratorium on hyperscale data centres until there is clear information about the costs to residents, ecosystems, resources, and the climate.

I am concerned about the expansion of large, resource-intensive data centres in Toronto for several reasons. First, hyperscale data centres used to power artificial intelligence and other computation-heavy digital processes demand a significant amount of electricity. This massive electricity load could strain our grid, leading to higher utility prices for Torontonians amidst a cost-of-living crisis.

Second, data centres pose a significant risk to our environment and climate. It is currently unclear whether the electricity for data centres will come from renewable energy or fossil fuels. Ontarians are firsthand experiencing climate impacts—another devastating wildfire season, dangerous air quality and record-breaking heat waves. It is paramount that we fully consider the potential greenhouse gas emissions of these projects. The proposed data centres will also use significant freshwater resources. It is reported that the proposed Microsoft Data Centre will use 1.2 billion litres per year. They also create significant noise pollution, which will disrupt local wildlife and surrounding communities.

Finally, I am wondering who truly benefits from these data centres? There is no information on how many permanent local jobs these projects will create. It is unclear whether these projects will create enough economic benefit to outweigh the significant risks outlined above. It seems these projects will only create profit for big tech billionaires at the expense of residents.

The public has not been properly informed about these projects, or given the opportunity to voice their concerns. You have the chance to protect our city by pausing these developments to ensure proper consultation and impact assessments take place, and an appropriate framework is established.

Motion MM43.75 does not go far enough, and we need at least a 1-year moratorium on hyperscale data centres until there is clear information about the costs to residents, ecosystems, resources, and the climate, and consent from our communities.

7722 Communications were received with text similar to the following:

The choice is yours: back big tech billionaires at the expense of everyday Torontonians, or uphold local democracy, ensure communities are consulted, and minimize environmental impacts.
