GENERAL LOCATION	SPECIFIC LOCATION	CONSTRUCTION and DEFICIENCY	BY-LAW SECTION and REQUIREMENT*

The proposed enclosure will be constructed using a climb-resistant mesh fencing system, consisting of a free-standing, modular design supported by weighted bases rather than permanently embedded posts. City of Toronto Municipal Code Chapter 447 Fences by-law sets out the requirements for Pool Fence Enclosures that must provide adequate barriers to ensure safety for all residents and users, including children and pets. Specifically, Chapter 447 sets out requirements to prevent access to hazardous areas and to withstand environmental pressures, such as wind and snow, to prevent hazards associated with fence failure, emphasizing safety, durability, aesthetics, and compliance with regulations.

The intent behind pool enclosure regulations is to prevent non-swimmers, including young children, from gaining unintended access to unsupervised pool areas.

May 26 2008 Toronto City Council (LS13.3)

On May 26 and 27, 2008, the City Council adopted the following motions:

1. The current provisions in Toronto Municipal Code Chapter 447, Fences with respect to four-sided pool enclosures are not amended to include any alternative safety devices.
2. Individuals be able to request an exemption from the four-sided pool enclosure provision, when it would not be practicable, because of a disability, as defined in the Ontarians with Disabilities Act, of an occupant of the building, to provide access in accordance with the requirements of the by-law.
3. When an exemption is granted, conditions considered appropriate by City Council to prevent a young child gaining access to the pool area unsupervised, be imposed.
4. When the need for an exemption ceases to exist, the pool enclosure is reinstated to comply fully with the provisions of the Chapter.
