Re: Traffic Calming – Sutherland Drive (Ward 15, Don Valley West)

Transportation Services has been requested by a local Councillor to provide recommended wording for recommendations they plan to present in a motion to North York Community Council. Staff request that this memorandum accompany the member's submission.

Summary

- ☐ Staff **support** the draft recommendations provided below
- ☐ Staff **do not support** the draft recommendations provided below
- X Staff **do not have sufficient data and/or time to determine if the draft recommendations provided below can be supported by staff, at this time.**

Draft Recommendations:

1. North York Community Council authorize the installation of traffic calming (four speed humps) on Sutherland Drive, between Parkhurst Boulevard and Stickney Avenue, generally as shown in Drawing Nos. TC-778 and TC-778-1, dated June 2026, from the Director, Enforcement and Street Management, Transportation Services.

The Ward Councillor has requested staff to prepare the necessary documentation and supporting materials to seek Community Council approval for the installation of traffic calming measures (speed humps) on Sutherland Drive, between Parkhurst Boulevard and Stickney Avenue.

The subject section of Sutherland Drive is an 8.5 metre wide, two-way, north-south local roadway with a 30 km/h speed limit.

Transportation Services recently completed a traffic calming study on Sutherland Drive, between McRae Drive and Stickney Avenue, that revealed the warrants for traffic calming are met. Specifically, the block length was greater than 120 metres and the 85th

percentile speed was 43 km/h. However, there was insufficient time to prepare a report for the July 7, 2026 North York Community Council.

The warrants for traffic calming have not been reviewed for Sutherland Drive, between Parkhurst Boulevard and McRae Drive. This section of Sutherland Drive is eligible for traffic calming and the block length is 200 metres but a 24-hour vehicle speed and volume study has not been completed.

Staff conducted site visits in June 2026 to map the proposed speed hump locations.

Cost

This cost for four speeds humps on Sutherland Drive, between Parkhurst Boulevard and Stickney Avenue is \$16,000.
