From: Director, Enforcement and Street Management, Transportation Services

Re: Dawlish Avenue – Motion Memorandum

Wards: Ward 15, Don Valley West

Transportation Services has been requested by a local councillor to provide recommended wording for recommendations they plan to present in a motion to North York Community Council. Staff request that this memorandum accompany the member's submission.

Summary

- ☒ **Staff support the draft recommendations provided below**
- ☐ **Staff do not support the draft recommendations provided below**
- ☐ **Staff do not have sufficient data and/or time to determine if the draft recommendations provided below can be supported by staff, at this time.**

Draft Recommendation

1. *North York Community Council authorize the installation of traffic calming (five speed humps) on Dawlish Avenue between Mildenhall Road and Bayview Avenue, generally as shown on attached Drawing No. ATP-SH-266 dated June 2026.*

In consultation with local community, the City developed the Lawrence Park Transportation Plan to inform the detailed design phase and implementation phases of the Lawrence Park Neighbourhood Investigation of Basement Flooding (Area 20) and Road Improvement Class Environmental Assessment (EA); make interim road improvements in advance of the Environmental Assessment implementation; and make road improvements that are independent of the Environmental Assessment implementation.

Traffic calming was identified as a road improvement appropriate to be made as an interim measure in advance of the Environmental Assessment implementation and was authorized for installation on nine road segments ([2025.NY24.15](#)).

Subsequent analysis of data gathered for the Lawrence Park Transportation Plan verifies that additional traffic calming on the segment of Dawlish Avenue between Mildenhall Road and Bayview Avenue is technically warranted.

At the request of the local Councillor, staff has prepared a draft recommendation and speed hump drawings to support the installation of traffic calming (speed humps) on Dawlish Avenue, included above and attached.

Cost

The estimated cost for the installation of one speed hump is \$4,000; five speed humps are proposed, for a total estimated cost of \$20,000. Funding is available, categorized as health and safety, in the approved 2026-2035 Capital Budget and Plan for Transportation Services.

If the number of approved requests for roadway traffic calming measures exceed the budget allocated for installation in a given year, funding for approved installations will be prioritized using a prioritization score to promote equitable distribution of service.
