

Traffic Calming (Speed Humps) - Corvette Avenue

Date: December 18, 2025

To: Scarborough Community Council

From: Director, Enforcement and Street Management, Transportation Services

Wards: Ward 20, Scarborough Southwest

SUMMARY

This staff report is about a matter that Community Council has delegated authority from City Council to make a final decision.

Transportation Services has reviewed the need for speed humps on Corvette Avenue, between Kennedy Road and Magnolia Avenue. The assessment indicates the warrant criteria as set out in the Traffic Calming Policy has not been satisfied. Therefore, staff do not recommend the installation of speed humps on Corvette Avenue.

RECOMMENDATIONS

The Director, Enforcement and Street Management, Transportation Services recommends that:

1. Scarborough Community Council not authorize the installation of speed humps on Corvette Avenue, between Kennedy Road and Magnolia Avenue.

FINANCIAL IMPACT

There are no financial impacts resulting from the adoption of the recommendation in this report.

If Scarborough Community Council amends the recommendation in this report and authorizes the installation of speed humps on Corvette Avenue, the estimated cost of installing eight speed humps is \$32,000.00. Funding would be subject to availability and competing priorities within the Transportation Services 2026 Interim Capital Budget.

DECISION HISTORY

This report addresses a new initiative.

COMMENTS

Transportation Services received a request from the Ward Councillor, on behalf of area residents, to investigate the feasibility of installing speed humps on Corvette Avenue, between Kennedy Road and Magnolia Avenue. The residents are concerned that motorists travel at a high rate of speed on Corvette Avenue.

Existing Conditions

Corvette Avenue is characterized by the following conditions:

- It is a two-lane, east-west, collector roadway
- It operates two-way traffic on a pavement width of approximately 8.5 metres
- The daily traffic volume is approximately 2,500 vehicles
- The speed limit is 40 km/h
- Heavy trucks are prohibited at all times
- There is no Toronto Transit Commission (TTC) service provided on this street
- There are sidewalks located on both sides of the street
- All-way stop controlled intersections are located at Hart Avenue and Linden Avenue

The land use in the area consists of single-family residential dwellings and Corvette Public School and Corvette Park are located on the north side. Corvette Avenue is designated as a Community Safety Zone, between Kennedy Road and Linden Avenue.

A map of the area and locations of the requested speed humps is included in Attachment 2.

Study Results

In order for speed humps to be recommended on a street, the eligibility and warrant criteria as set out in the City of Toronto's Traffic Calming Policy must be satisfied. The eligibility criteria include the road classification, the presence of sidewalks, maximum traffic volume, the road grade and the impacts to emergency services and transit. The warrant criteria include the block length and the operating speeds. Details of the eligibility and warrant criteria are included in Attachment 1.

As part of the assessment of the warrant criteria, a vehicle speed and volume study was conducted on Corvette Avenue from February 27 to 29, 2024.

The study results on Corvette Avenue disclosed the following:

- 24-hour total vehicle volume is 2,500 vehicles

- The block length from Kennedy Road to Hart Avenue is 243 metres, from Hart Avenue to Linden Avenue is 220 metres, and from Linden Avenue to Magnolia Avenue is 160 metres
- The operating speed, which is the speed at which 85 percent of traffic is travelling at or below, was observed at 43 km/h
- The 95th percentile speed, which is the speed at which 95 percent of traffic is travelling at or below, was observed at 47 km/h

Based on the study results, the warrant for traffic calming was not met for the following reasons:

- Minimum speed: In order to meet the minimum speed warrant, the operating (85th percentile) speed must be a minimum of 8 km/h over the warranted speed limit or the 95th percentile speed needs to be a minimum of 15 km/h above the warranted speed limit. The operating speed was recorded at 43 km/h, which is 5 km/h under the required speed of 48 km/h. The 95th percentile speed of 47 km/h is 8 km/h under the required speed of 55 km/h.

The overall investigation concluded that the eligibility and warrant criteria as outlined in the Traffic Calming Policy has not been satisfied. Therefore, staff do not recommend the installation of speed humps on Corvette Avenue.

Alternate Recommendations

If, despite the findings above, Scarborough Community Council decides to proceed with installing speed humps on Corvette Avenue, between Kennedy Road and Magnolia Avenue, it may approve the following:

1. Scarborough Community Council authorize the installation of traffic calming (eight speed humps) on Corvette Avenue, between Kennedy Road and Magnolia Avenue, generally as shown on the attached Drawing Nos. TC-630 and TC-630-1, dated December 2025 from the Director, Enforcement and Street Management Transportation Services.
2. Subject to approval of Recommendations 1, Scarborough Community Council reduce the speed limit from 40 km/h to 30 km/h on Corvette Avenue, between Kennedy Road and Magnolia Avenue, in conjunction with the installation of speed humps.

The estimated cost for installing eight speed humps on Corvette Avenue is \$32,000.00. The installation of speed humps on Corvette Avenue would be subject to availability in Transportation Services 2026 Interim Capital Budget and competing priorities.

Relative Priority and Other Impacts

In the event that the number of approved requests for roadway traffic calming measures (speed humps) exceed the budget allocated for installation, funding for approved installations will be prioritized using a Prioritization Score. This score is made up of a Quantitative Score and a Qualitative Score.

The Quantitative Score is based on the results of the data collection, including travel speeds and traffic volumes to prioritize locations with higher vehicle speeds and volumes.

The Qualitative Score includes:

- Collision history to prioritize locations with a history of serious injury or fatal collisions and those involving a pedestrian or person cycling
- Equity to prioritize equity-deserving communities with a high-concentration of priority populations and those that are transportation disadvantaged
- Expected presence of vulnerable road users (elderly population, school children, people cycling and pedestrians, including transit riders) to prioritize locations with a higher risk of fatal and serious injury collisions

The Quantitative and Qualitative Scores are averaged to provide the complete Prioritization Score. Corvette Avenue, between Kennedy Road and Magnolia Avenue, scored 32 ranking points out of a possible 100.

No alterations to parking regulations would be required, nor would the number of parking spaces be affected by the installation of speed humps. Installation of speed humps would have minimal effect on winter services, street cleaning and garbage collection.

Consultation with Emergency Services

Consultation with emergency services (Toronto Police Service, Toronto Fire Services and Toronto Paramedic Services) is required to ensure that the design and layout of a traffic calming proposal does not unduly affect their operations. Emergency services were advised of this proposal.

Toronto Paramedic Services responded and advised of potential delays in emergency responses but expressed support for initiatives that enhance community safety. A copy of their full response is included in Attachment 4. Toronto Police Service and Toronto Fire Services have not provided comments at the time of writing this report. Installing speed humps will result in slower operating speeds for all vehicles, including emergency service vehicles.

The Ward Councillor has been advised of the recommendation in this report.

ATTACHMENTS

- Attachment 1: Traffic Calming Warrant - Corvette Avenue
- Attachment 2: Speed Hump Locations Plan - Corvette Avenue, Magnolia Avenue - Kennedy Road (Matchline, see drawing TC-630-1)
- Attachment 3: Speed Hump Locations Plan - Corvette Avenue, Magnolia Avenue - Kennedy Road
- Attachment 4: Letter from Toronto Paramedic Services, dated December 4, 2025

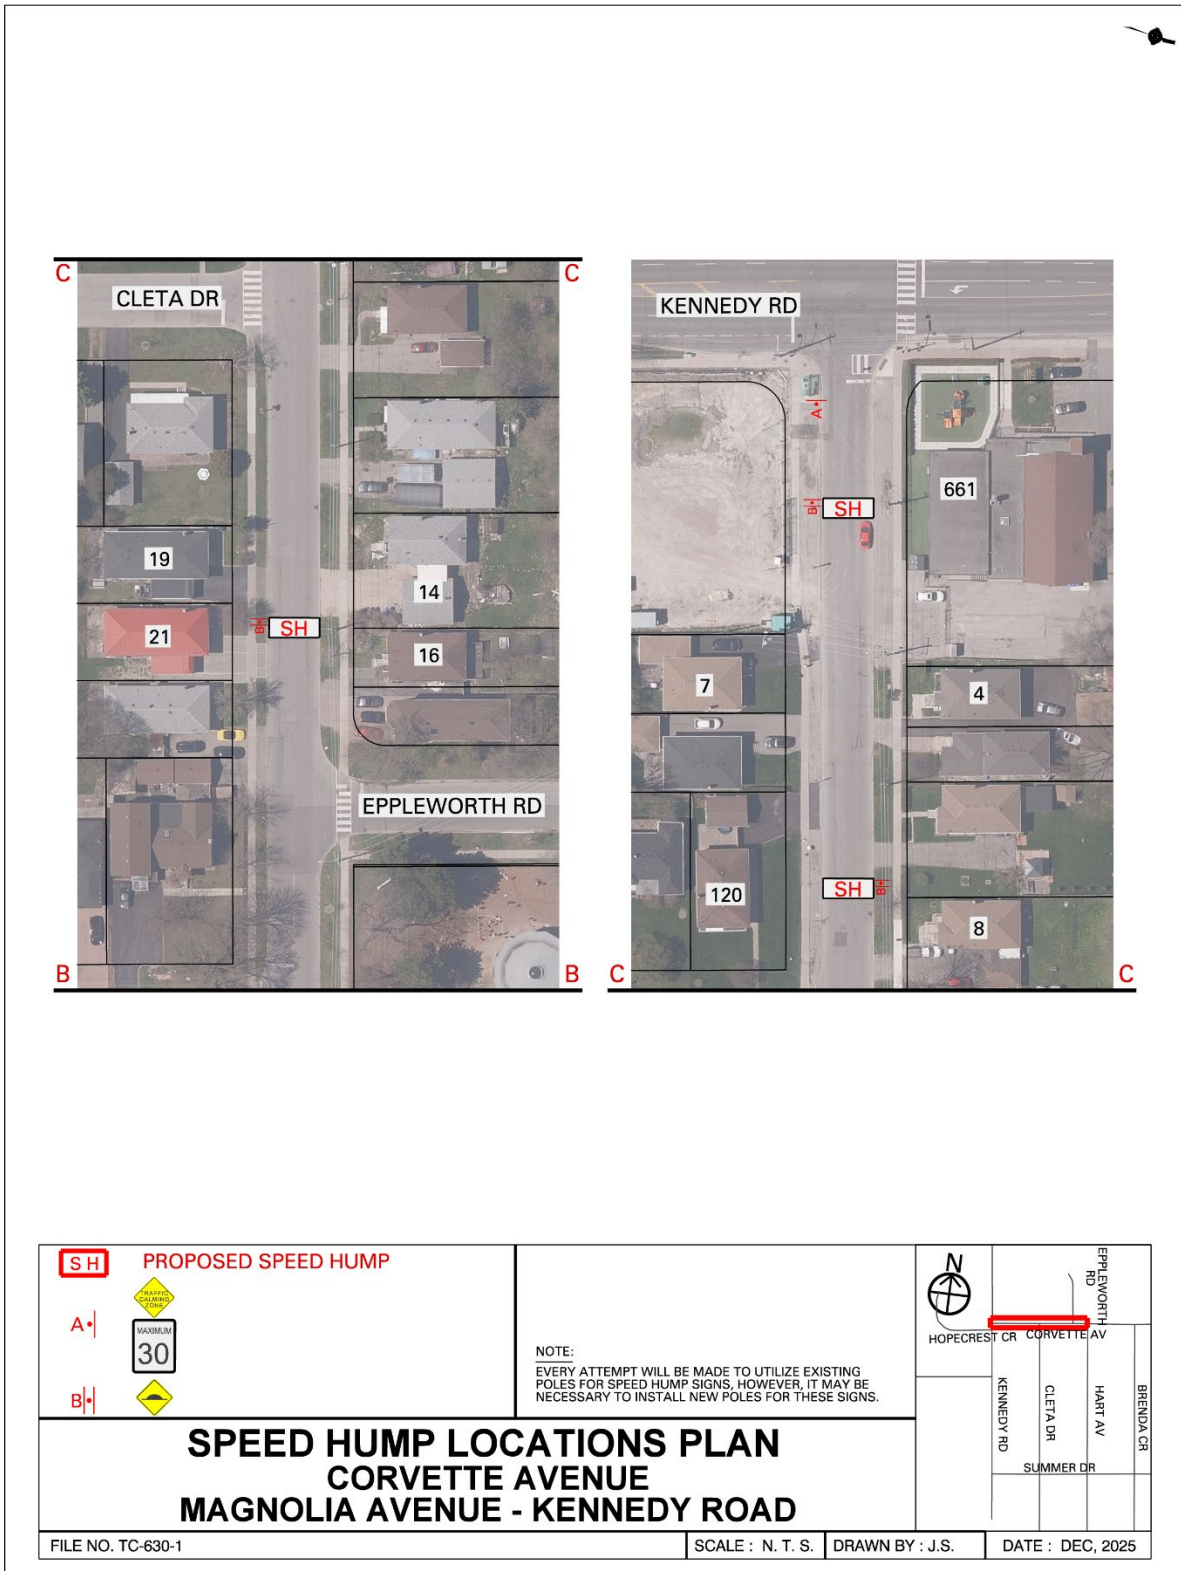

Attachment 1: Traffic Calming Warrant - Corvette Avenue

Criteria		Requirement	Warrant Satisfied?
Community Support		A direct request from the Ward Councillor OR identified by Transportation Services in consultation with the Ward Councillor	Yes
Eligibility Criteria	Road Classification	Classified as a local or collector roadway, according to the Toronto Road Classification System	Yes
	Sidewalks	Presence of a sidewalk on at least one side of a local roadway and both sides of a collector roadway is preferred but not required	Yes
	Traffic Volume	Maximum average daily traffic volume of less than 8,000 vehicles per day	Yes
	Road Grade	Maximum roadway grade of up to 5%, can be considered in locations where the road grade is between 5% and 8% with additional review	Yes
	Emergency Services	No significant impacts on emergency services, including Toronto Fire, Paramedic and Police Services	Yes
	Transit Services	No significant impacts to regularly scheduled Toronto Transit Commission (TTC) services	N/A
Warrant Criteria	Minimum Block Length	Minimum block length of 120 metres based on the measured distance from centre to centre of controlled intersections AND	Yes (243m, 220m, 160m)
	85th percentile speed	Minimum 85th percentile speed of 8 km/h over the warranted speed limit OR	No (43 km/h)
	95th percentile speed	Minimum 95th percentile speed of 15 km/h over the warranted speed limit	No (47 km/h)

Subject: RE: Traffic Calming on Corvette Avenue

Follow Up Flag: Follow up
Flag Status: Flagged

Hi Amir,

We have received and reviewed the proposal for installation of speed humps on Corvette Avenue between Kennady Road and Magnolia Avenue, with the following comments:

The installation of speed humps on Corvette Avenue between Kennady Road and Magnolia Avenue, will impact response and transport times for residents that reside on the roadway speed humps are installed. Impacts may extend to community members if Corvette Avenue between Kennady Road and Magnolia Avenue, serves access to other roadways. It is important that the applicant understands that the installation of traffic calming devices will reduce the speed that emergency vehicles travel when responding to emergencies on roadways where they are installed.

Toronto Paramedic Services is supportive of community initiatives that improve the safety of all citizens of, and visitors to, the City of Toronto. Traffic and pedestrian safety are key components of a healthy neighbourhood, and we endeavour to support the wishes of the community to implement measures to improve upon these components.
