Dear Chair and Members of Scarborough Community Council,

**Re: Morningside - Corridor Review**

**Summary**

Morningside is a vital corridor in the east end of Toronto. Many residents have communicated with my office about traffic congestion and conditions that make intersections along Morningside unsafe. We are asking for a comprehensive study to see what improvements we can make for a better commute along Morningside.

**Recommendations:**

1. City Council request the Director, Enforcement and Street Management, Transportation Services, in coordination with the Toronto Transit Commission (TTC) to conduct a review of traffic and transit operation on Morningside Avenue between Finch Avenue East and Lawrence Ave East and report back to Scarborough Community Council with findings and any appropriate recommendations, including consideration of: road safety, transit performance, intersection performance, traffic speed, traffic volume, and level of service for active transportation modes with a report back to Scarborough Community Council in the Third Quarter of 2027.

Sincerely,

A handwritten signature in black ink, appearing to read "Neethan Shan", with a horizontal line underneath.

Neethan Shan  
City Councillor
