To: Scarborough Community Council

On behalf of Paisley Products of Canada Inc., we support extending the standing prohibition on Upton Road to amend the existing standing prohibition (in effect at all times) on the south side of Upton Road, between the east end of Upton Road and a point 82 metres west, to instead be in effect from the east end of Upton Road to a point 124 metres west for safe access/traffic flow for deliveries and pick-ups, and appreciate it being brought forward for consideration.

Extending the standing prohibition from 82 metres to 124 metres will make a critical difference to ensure continued safety and access to our loading and shipping docks especially for 53 foot tractor trailer trucks regularly making deliveries from suppliers and picking up for customers.

We are privileged to serve world mandate customers from our Scarborough location and to be recognized as critical infrastructure supplying just-in-time delivery to critical upstream supply chain for essential services needed to support critical infrastructure.

Our high performance engineered materials including pressure sensitive tapes and adhesives, silicones, epoxies, coatings, sleeving, heat-shrink tubing, electrical insulation, identification, specialized raw material inputs, precision mixing and dispensing technologies that are extensively used in the manufacturing of transportation, shipping, utilities, communications, construction, aerospace, shipbuilding, food and agriculture, chemical manufacturing, nuclear facilities, sanitation, water and waste water treatment, emergency services and defense and security, along with other essential industries.

There are hundreds of active businesses throughout Canada and internationally relying on us to fulfil their unique just-in-time raw material needs and material requirements and Paisley Products of Canada Inc. 40 Upton Road Scarborough location is our primary fabrication and fulfilment location.

We have 30+ highly engaged and skilled team members employed in Scarborough, Ontario, and Montreal, Quebec working day and day out to fulfil these demanding requirements.

Keeping our Scarborough receiving and shipping docks unobstructed, safe and accessible to vendors and customers to deliver and pick up throughout operating hours is critical to our operations and ongoing accessibility and continuity of services from our Scarborough location.

We thank you and the council for your support and consideration to extend the standing prohibition on Upton Road from 82 metres to 124 metres to help keep our dedicated loading and delivery areas safe and unobstructed. In doing so this also helps prevent these large 53 foot

trucks from having to back up Upton Road when they are obstructed from loading and unloading and exiting safely forward once they unload or pick-up.

We thank you and the councilors for your support and keeping the loading and delivery areas safe and unobstructed.

Sincerely,

Marlon Paisley
