From: Mike Barnet, Director, Enforcement and Street Management

Re: Traffic Calming – Vesta Drive, between Eglinton Avenue West and Old Forest Hill Road (Ward 12, Toronto-St. Paul's)

Transportation Services has been requested by the Ward 12 Councillor to provide recommended wording for recommendations they plan to present to the July 8 and 9, 2026, Toronto and East York Community Council. Staff request that this memorandum accompany the member's submission.

This memorandum is about a matter that Community Council has delegated authority from City Council to make a final decision.

Summary

- ☐ Staff **support** the draft recommendations provided below
- ☐ Staff **do not support** the draft recommendations provided below
- X Staff do not have sufficient data and/or time to determine if the draft recommendations provided below can be supported by staff, at this time

Draft Recommendations

1. *Toronto and East York Community Council authorize the installation of traffic calming (three speed humps) on Vesta Drive, between Eglinton Avenue West and Old Forest Hill Road, generally as shown on the attached Drawing No. TC-746, dated June 2026 from the Director, Enforcement and Street Management, Transportation Services.*

At the request of the Ward Councillor, staff were asked to consider the feasibility of implementing traffic calming (speed humps) on Vesta Drive, between Eglinton Avenue West and Old Forest Hill Road, to improve safety for all road users. It has been reported that the high volume of traffic and excessive vehicle speeds create a hazardous environment for residents and students walking to and from Forest Hill Collegiate. Residents have also indicated that they often struggle to exit their driveways because of the constant flow of cars, with many traveling above the posted speed limit and, at certain times of day, due to traffic congestion on the street.

As the Councillor has indicated they would like to forgo the study process, motorist speed and volume data were not collected, and staff have not evaluated the installation of traffic calming measures (speed humps) on the roadway. Staff conducted a site visit in June 2026 to map the proposed speed hump locations.

Financial Impact

Staff have not been able to develop engineering estimates for this work but based on previous experience and similar work in the past, staff expect the costs associated with approving the draft recommendation above will be approximately \$12,000.00. As this work was not anticipated, it has not been specifically included in any approved budgets. Completion of the work would be subject to availability and competing priorities within future Transportation Services Capital Budgets, unless a specific funding source is identified by the Councillor and approved by Toronto and East York Community Council.
