From: Mike Barnet, Director, Enforcement and Street Management

Re: Ordnance Street, between Strachan Avenue and the south end of
Ordnance Street – Traffic Calming (Ward 10, Spadina-Fort York)

Transportation Services has been requested by the Ward 10 Councillor to provide recommended wording for recommendations they plan to present to the July 8 and 9, 2026, Toronto and East York Community Council. Staff request that this memorandum accompany the Councillor's letter.

This memorandum is about a matter that Community Council has delegated authority from City Council to make a final decision.

Summary

- ☐ Staff **support** the draft recommendations provided below
- ☐ Staff **do not support** the draft recommendations provided below
- X Staff do not have sufficient data and/or time to determine if the draft recommendations provided below can be supported by staff, at this time.

Draft Recommendations

1. *Toronto and East York Community Council authorize the installation of traffic calming (three speed humps) on Ordnance Street, between Strachan Avenue and the south end of Ordnance Street, generally as shown on the attached Drawing No. TC-737, dated June 2026, from the Director, Enforcement and Street Management, Transportation Services.*

At the request of the Ward Councillor, staff were asked to consider the feasibility of implementing traffic calming (speed humps) on Ordnance Street, between Strachan Avenue and the south end of Ordnance Street. The surrounding area experiences a high volume of foot traffic associated with pedestrian generators, which include businesses on Strachan Avenue, Impark Lot #525 at 11 Ordnance Street, and residential neighborhoods. There is an uncontrolled crossing located at the horizontal curve, and it is reported that motorists are speeding on the subject street when travelling to and from their residence.

As the Councillor has indicated they would like to forgo the study process, motorist speed and volume data were not collected, and staff have not evaluated the installation of traffic calming measures (speed humps) on the roadway. Staff conducted a site visit in June 2026 to map the proposed speed hump locations.

Financial Impact

Staff have not been able to develop engineering estimates for this work but based on previous experience and similar work in the past, we expect the costs associated with approving the draft recommendation above will be approximately \$12,000.00. As this work was not anticipated, it has not been specifically included in any approved budgets. Completion of the work would be subject to availability and competing priorities within future Transportation Services Capital Budgets, unless a specific funding source is identified by the Councillor and approved by Toronto and East York Community Council.
