From: Mike Barnet, Director, Enforcement and Street Management

Re: Traffic Calming – Edmund Avenue, between Avenue Road to Poplar Plains Road (Ward 12, Toronto-St. Paul's)

Transportation Services has been requested by the Ward 12 Councillor to provide recommended wording for recommendations they plan to present to the July 8 and 9, 2026, Toronto and East York Community Council. Staff request that this memorandum accompany the member's submission.

This memorandum is about a matter that Community Council has delegated authority from City Council to make a final decision.

Summary

- ☐ Staff **support** the draft recommendations provided below
- ☐ Staff **do not support** the draft recommendations provided below
- X Staff do not have sufficient data and/or time to determine if the draft recommendations provided below can be supported by staff, at this time

Draft Recommendations

1. *Toronto and East York Community Council authorize the installation of traffic calming (three speed humps) on Edmund Avenue, between Avenue Road to Poplar Plains Road, generally as shown on the attached Drawing No. TC-749, dated June 2026 from the Director, Enforcement and Street Management, Transportation Services.*

At the request of the Ward Councillor, staff were asked to consider the feasibility of implementing traffic calming (speed humps) on Edmund Avenue, between Avenue Road and Poplar Plains Road, to improve safety for all road users. It has been reported that there are concerns regarding the increasing volume and speed of traffic on this segment of Edmund Avenue. It was noted that Edmund Avenue is frequently used as a shortcut to Avenue Road in the morning and as an alternative to the Avenue Road gridlock in the evening. Residents note that motorists regularly speed towards the traffic signals at the east end in the morning or toward Poplar Plains in the afternoon.

As the Councillor has indicated they would like to forgo the study process, motorist speed and volume data were not collected, and staff have not evaluated the installation of traffic calming measures (speed humps) on the roadway. Staff conducted a site visit in June 2026 to map the proposed speed hump locations.

Financial Impact

Staff have not been able to develop engineering estimates for this work but based on previous experience and similar work in the past, staff expect the costs associated with approving the draft recommendations above will be approximately \$12,000.00. As this work was not anticipated, it has not been specifically included in any approved budgets. Completion of the work would be subject to availability and competing priorities within future Transportation Services Capital Budgets, unless a specific funding source is identified by the Councillor and approved by Toronto and East York Community Council.
