Date: February 25, 2026 9:15:30 AM

Please publish this email public.

There is absolutely no way that a zoo can ever provide an adequate home for large warm weather animals like Rhinoceros. Please move the rhinoceros and giraffes to a sanctuary in a warm climate. Please also stop having great apes in captivity. They need to move to a sanctuary where they can live a more autonomous life. And please stop having pet the animals events like shown in the slides with a tamandua. The animals do not consent to being petted and this teaches children to pet and feed wildlife. Nicole Corrado
