WE'VE BEEN GROWING!

Downtown Toronto has experienced unprecedented growth, doubling in population over the past 25 years and continuing to intensify. In the heart of our growing Downtown is the Rail Corridor, which provides a unique opportunity to enhance city building.

City Council has requested Staff to look at redesignating the lands over the downtown rail corridor, between Blue Jays Way and Bathurst Street, to park space. Staff have started that work and are looking comprehensively at how decking over the corridor can contribute to a prosperous, livable and accessible community. The City-initiated Official Plan Amendment is proposing to establish updates to the Railway Lands West and Central Secondary Plans. The amendments will provide an updated planning framework for this part of the rail corridor.

WE WANT TO HEAR FROM YOU!

On Tuesday, June 13th the City is hosting a Public Meeting on the future of the Rail Corridor. City Staff will share work to date on an Official Plan Amendment (OPA) for the Rail Corridor. Join us to learn about preliminary findings and next steps and to share your comments and ideas for this site.

PLANNING A GREAT CITY
TOGETHER
