

HCTP Biosolids Management Schedule B EA

HCTP NLC Meeting
May 13, 2013

Details of EA

- Undertaken as a Schedule B Class Environmental Assessment
 - Will include a Health Impact Assessment overseen by TPH and a Cumulative Impact Assessment that will be overseen by EEO
 - Will look at all viable biosolids management options
- City Project Team will include Toronto Public Health, Toronto Environment and Energy Office and Toronto Water
 - Public Consultation Unit

Scope of Work

- Prepare long list of biosolids management options available including “do nothing” option.
- Screening level assessment of all viable biosolids management options to obtain a short list to undertake a more detailed assessment.
- Undertake a Cumulative Impact Assessment and Health Impact Assessment of short listed options.

Scope of Work

- Development of a comparative assessment that incorporates the results of the CIA and HIA
- Consultation with the public and the surrounding community during key points in the process
- Preparation and presentation of a biosolids management strategy for HCTP in a stand alone report.

Schedule

- RFP scheduled to close on May 24
- Anticipated successful Consultant will be on board by early August
- Approximate timeline 12-18mths
