What is TransformTO?

TransformTO

Project to set Toronto on track for a low-carbon sustainable future where we are healthy, there are good jobs, and we live in an equitable community

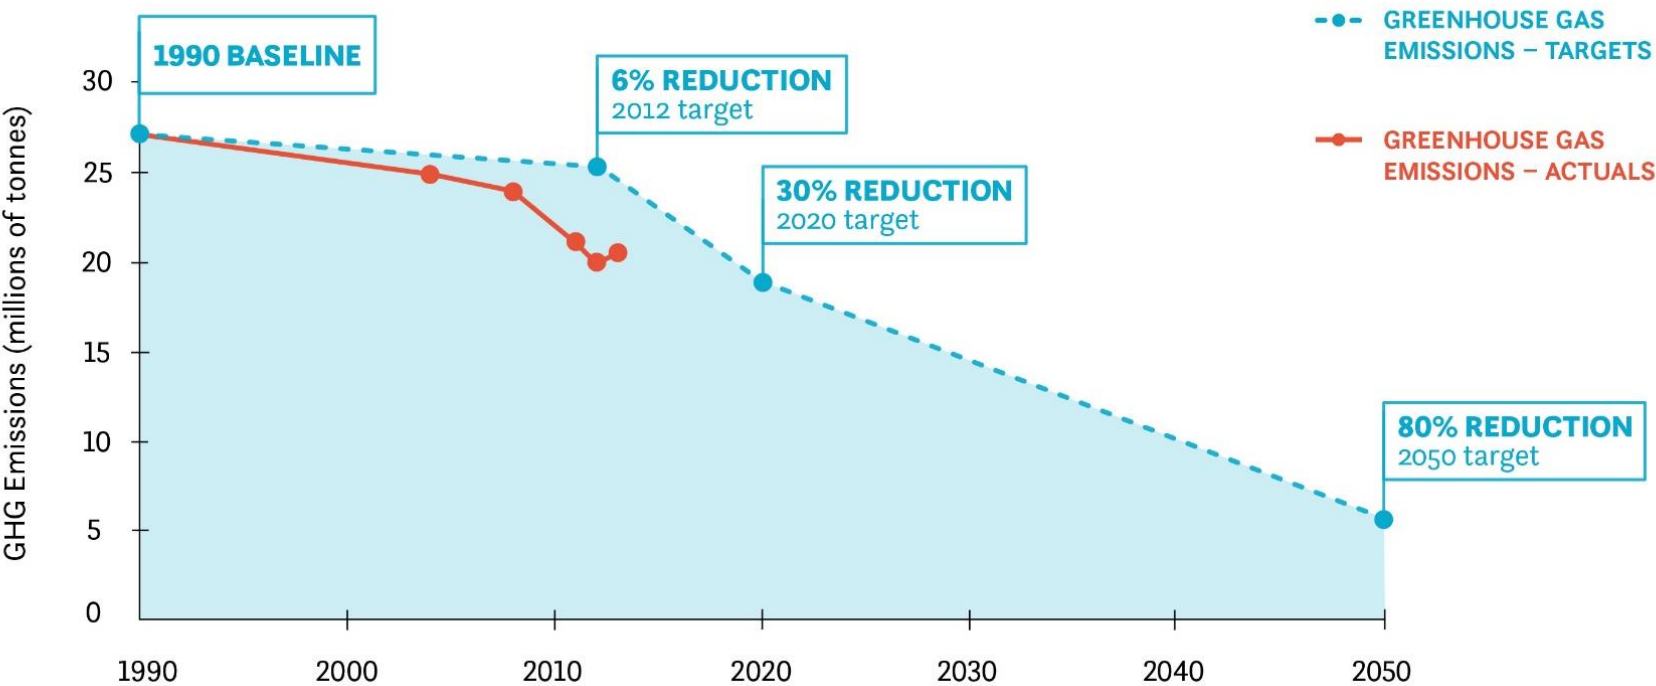

TransformTO

Our target is to reduce greenhouse gas emissions by 80% by 2050

Toronto's Greenhouse Gas Emissions & Targets

15 MILLION TONNES
reduction is needed by
2050 from 2013 levels
to hit targets.

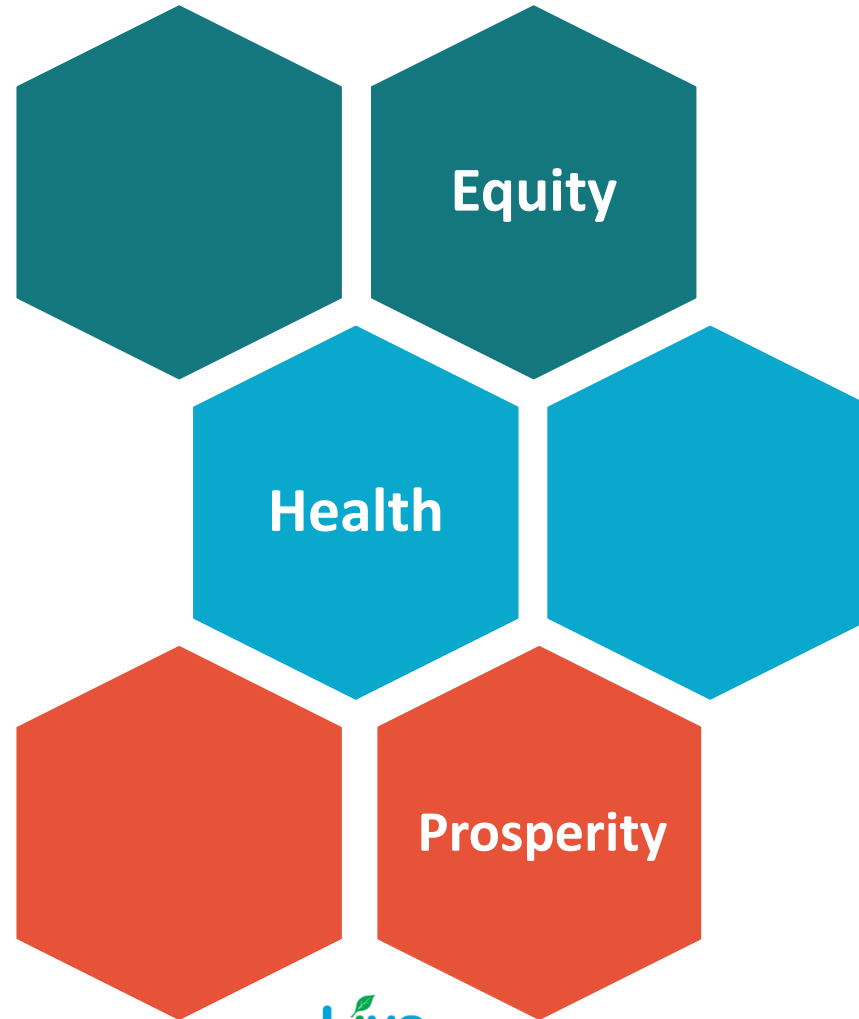

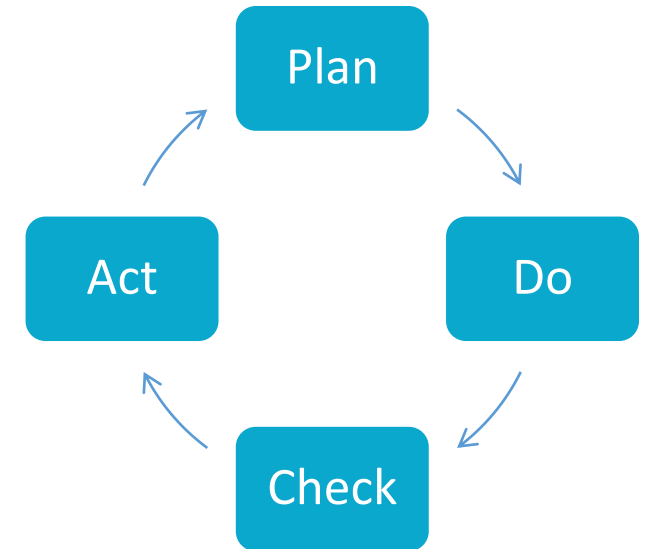

TransformTO

What We've Heard So Far

We've talked to over 1000 Torontonians.

Transportation	Behaviour Change	Green Space	Energy	Buildings
Improve public transit (accessibility, affordability, reliability)	Provide resources and incentives for community networks	Plant more trees	Provide financial support for energy efficiency projects	Strengthen / enhance green building standards for new construction
Implement road tolls	Support stronger local & sharing economies	Support urban agriculture/ food production (allocate space, educate)	Install more renewable energy (geothermal, solar, deep lake water cooling)	Require energy retrofits to existing buildings
Invest more in cycling and pedestrian infrastructure	Support carbon pricing (e.g. carbon tax/ polluter pays)	Naturalize unused areas (hydro corridors, brownfields, lawns)	Install more district energy systems	Provide information/ incentives for less energy use in our homes and offices
Build complete, compact, walkable communities	Increase environmental education, awareness & research	Create more green spaces & parks	Switch from natural gas and car gasoline to electricity	Install more green roofs on existing buildings

TransformTO

Objectives for Tonight's Event

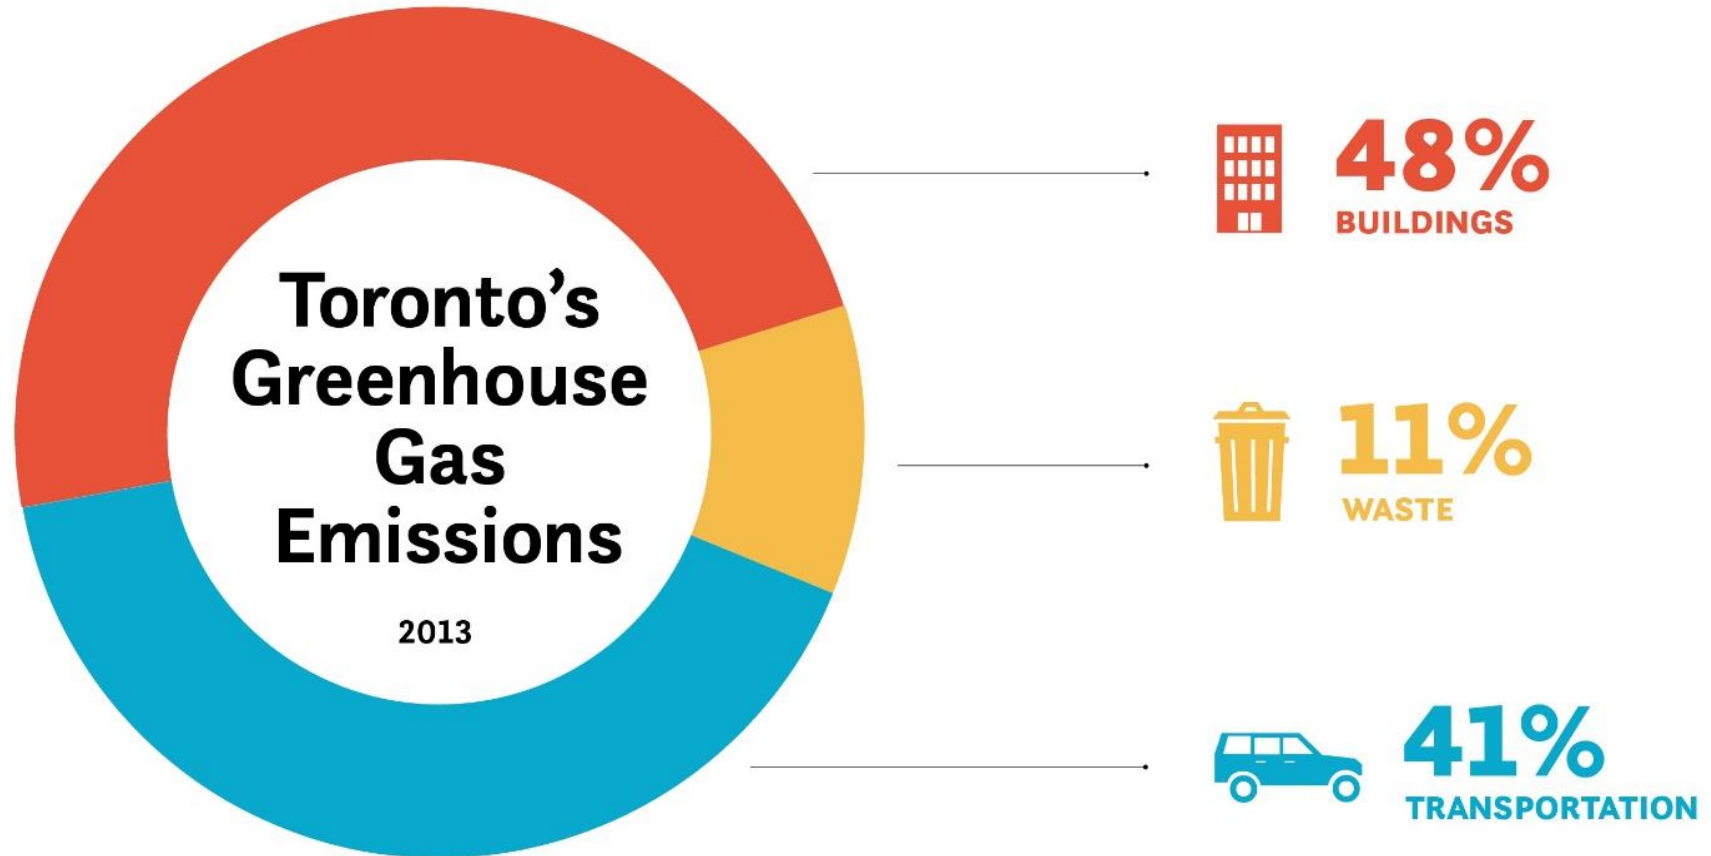

Roundtable Conversations

- Co-create a shared vision of a low-carbon Toronto in 2050 that reflects different community perspectives
- Discuss how we can achieve our shared vision

TransformTO

Where Are Our Emissions Coming From?

TransformTO

Discussion Questions (20 Minutes Each)

1. Describe what the future of Toronto in 2050 looks like to you.
2. How can we achieve the vision you described?
3. How would you tell your neighbour that climate change is an important issue?
